Brothers & Sisters,

Please find attached to this e-mail documents to be covered tonight on the net.
There are several pages. You can print them out or read them online.
Any questions,
call me.

These pages were pulled from the ARRL Members Web site.

160. ECARN net for tonight

Yahoo group: Area_5_ECARN_Group
Date: 2014-01-11 16:59:45 UTC
From: Charles D Young
Topic: 160 Message: 160

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT (that's 8:30 Sunday morning for the folks Down Under). This week we will continue our efforts on Practice Test Messaging. Also we will discuss this year's district conventions and the assignment your congregation was given.

An e-mail advising the frequency will be sent closer to net time and we will be on 80 meters, and we will continue to send this message to both the ECARN Yahoo Groups and regular e-mail for those who have not yet joined the Yahoo Groups page. I encourage any who have not joined yet to do so as soon as possible. If you want to join the group via the Yahoo Groups page, please send me an e-mail and I will send you an "invitation," which makes joining a one-click operation. The invitation has a box on the page that says "Join This Group."? All you have to do is click on the box and you're in!

If you have questions or need help with the process, please call or e-mail me and I'll walk you through it.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that also, let me know.

Thanks!? Hope to hear you all on the net tonight. We'll be on in a few minutes trying to find a frequency.

Charlie

161. ECARN net for tonight

Yahoo group: Area_5_ECARN_Group
Date: 2014-01-18 17:57:48 UTC
From: Charles D Young
Topic: 160 Message: 161

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT (that's 8:30 Sunday morning for the folks Down Under).

We will try to continue our message practice tonight so find your materials that were sent out. For our stations on the west coast, please remember that Ralph (WD0EJA) will not be on the air tonight. He is on RBC assignment.

An e-mail advising the frequency will be sent closer to net time, and we will continue to send this message to both the ECARN Yahoo Groups and regular e-mail for those who have not yet joined the Yahoo Groups page. I encourage any who have not joined yet to do so as soon as possible. If you want to join the group via the Yahoo Groups page, please send me an e-mail and I will send you an invitation, which makes joining a one-click operation. The invitation has a box on the page that says "Join This Group." All you have to do is click on the box and you're in!

If you have questions or need help with the process, please call or e-mail me and I'll walk you through it.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that also, let me know.

Thanks!

Hope to hear you all on the net tonight. We'll be on the air at 6:30-7:00 pm trying to find a frequency.

162. News of our Australian brother and sister

Yahoo group: Area_5_ECARN_Group
Date: 2014-01-19 00:39:40 UTC
From: Charles D Young
Topic: 162 Message: 162

Brothers and Sisters,

Brother Phillip Hollis-Watts and his wife Maureen are dealing with serious illness and I knew you would all want to know. Phil (VK6KPH) is dealing with very progressed cancer and is undergoing chemotherapy at a hospital every few days. His wife, a long-time regular pioneer, has arthritis in her spine that is inoperable. She is now on the infirmed pioneer list, a most loving arrangement of the faithful slave. Maureen is a wannabee ham operator but just hasn't had the opportunity to study for the exam yet, what with other priorities taking precedence. "We need the kingdom", where Phil says they will go boot-scooting again.

Phil and Maureen are in Australia, about 40 miles from some of the bad wildfires, if I have my information straight. He included a link to the ABC news affiliate in Australia for more information about the fires. They are having some 100-plus degree days -- that's Fahrenheit! I think about 50 homes have burned so far. Here is an excerpt from his e-mail:

http://www.abc.net.au/news/justin/
latest on SE Australia 1 dead so far.
WA temp up to +36/7 C ~ +100 F more fire problems here again.
children (~ 13 years old) caught trying to light fires in WA ,
punishment, told not to do it again??
Maybe a child correction agency would be appropriate!
de VK6KPH
Phil
brothers affected ? unknown at this stage.

WA is Western Australia, I assume, and not Washington. (smile)

I will keep you updated as I learn more. Phil's e-mail is: Phillip HOLLIS-WATTS <p.hollis-watts@...
<mailto:p.hollis-watts@...>>

His mailing address is: 3 Araluen Crescent BERTRAM WA 6167

As always, if you have any questions or concerns, call me.

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT (that's 8:30 Sunday morning for the folks Down Under). Please look for Don Smith, K5TER, as Net Control. Also Roger Nash, W5RDN, will be on the air. EchoLink will be up with KD0APS and K3KEN as conference tie in.

Linda and I will not be there tonight. We will return next week.

An e-mail advising the frequency will not be sent. Please look at 3.846 +/-.

This message is being sent to both the ECARN Yahoo Groups and regular e-mail for those who have not yet joined the Yahoo Groups page. I encourage any who have not joined yet to do so as soon as possible. If you want to join the group via the Yahoo Groups page, please send me an e-mail and I will send you an "invitation," which makes joining a one-click operation. The invitation has a box on the page that says "Join This Group." All you have to do is click on the box and you're in!

170. Invitation to join new West Coast net

Yahoo group: Area_5_ECARN_Group
Date: 2014-02-13 23:34:13 UTC
From: Charles D Young
Topic: 170 Message: 170

Brothers and Sisters,

Please scroll down and read two e-mails I received from Bill Hampy (WB6LIP) in California regarding another net and an invitation (for any of us who wants to) to join. The net will be at 6:30 PST or 8:30 CST tonight.

Charlie

P.S. to Bill Hampy: West Coast ECARN might work, or perhaps West Coast Rendezvous Net. Others might have suggestions, too. Call me by phone when it's convenient for you.

Good morning Charlie:
We are going to try and get a West Coast net started up again. First time will be Thurs. 6:30 p.m. PST on 3.853. If that freq. is occupied we will go to 3.858 at 6:35. If that freq. is busy we will go to 3.963 at 6:40 etc.. But we hope 3.853 will become the regular frequency as it is the East Coast frequency. I hope you can join us. Right now it is just KG7KA, Loren in Las Vegas, and myself. If you want to let any of the others know that would be fine. If it works we will probably just welcome check-ins and take suggestions for times and frequency. I do not have Ralph's, WD0EJA, email address but he said he would be willing to help us if you want to let him know.
Thanks and have a great day,
Bill - WB6LIP

On 2/12/2014 9:57 AM, Bill Hampy wrote:

Good morning Charlie

We tested the time and frequency last night and it looks good. There was a lot of QRN but the 5x9 +10 signals ran well above it. Could you please see if Ralph WD0EJA or anyone else wants to join us?

It will be this Thursday at 6:30pm PST on 3.853. If we get this going how should we refer to the net? Terry WB6TA or I can act as Net Control for now.

Thanks for your help,

Bill WB6LIP

172. ECARN net for tonight

Yahoo group: Area_5_ECARN_Group
Date: 2014-02-15 20:23:55 UTC
From: Charles D Young
Topic: 160 Message: 172

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT (that's 8:30 Sunday morning for the folks Down Under). We will be discussing the formation of the West Coast ECARN net that is being set for Thursday nights at 8:30 p.m. CST.

For our Area 5 ECARN net tonight, please start looking around frequency 3.846. If there is traffic on that frequency, try plus or minus. If there is a radical change in the frequency, we will send a new e-mail at that time. We will continue to send this message to both the ECARN Yahoo Groups and regular e-mail for those who have not yet joined the Yahoo Groups page. I encourage any who have not joined yet to do so as soon as possible. If you want to join the group via the Yahoo Groups page, please send me an e-mail and I will send you an "invitation," which makes joining a one-click operation. The invitation has a box on the page that says "Join This Group." All you have to do is click on the box and you're in!

If you have questions or need help with the process, please call or e-mail me and I'll walk you through it.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that also, let me know.

Thanks! Hope to hear you all on the net tonight. We'll be on about 6:45 CST trying to preserve 3.846 or one close to that, and for early check-ins who may be short-timers.

Charlie

Hello brothers:
A reminder that the West Coast ECARN Net will begin at 6:30pm on 3.853. Please remember the 5 x 5 rule (6:35pm look on 3.858, etc.) I am hoping this email goes out as planned. I will know shortly since I listed myself as a "member' also. If you know a brother or sister who would like to be added to this list and you would be willing to vouch for them, just let them know or you can do it for them to send me their callsign and e-mail address.
Thank you and we look forward to hearing you on the net any Mon., Thurs. or Sat. evening.

Bill - WB6LIP - billhampy@...

176. ECARN net for tonight

Yahoo group: Area_5_ECARN_Group
Date: 2014-02-22 23:20:41 UTC
From: Charles D Young
Topic: 160 Message: 176

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT.

We will continue to send this message to both the ECARN Yahoo Groups and regular e-mail for those who have not yet joined the Yahoo Groups page.

I encourage any who have not joined yet to do so as soon as possible. If you want to join the group via the Yahoo Groups page, please send me an e-mail and I will send you an "invitation," which makes joining a one-click operation. The invitation has a box on the page that says "Join This Group." All you have to do is click on the box and you're in!

If you have questions or need help with the process, please call or e-mail me and I'll walk you through it.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that also, let me know.

Thanks!

Hope to hear you all on the net tonight.

Charlie

Brothers & Sisters:

Due to circumstances beyond my control, that have taken place in the last 30 minutes, I will not be on the net tonight.
Also, Roger Nash (W5RDN) will not be on the air tonight. Linda and I will return next week. Please hold the net and
send me an e-mail listing of participants.

186. ECARN net for tonight

Yahoo group: Area_5_ECARN_Group
Date: 2014-03-01 17:52:41 UTC
From: Charles D Young
Topic: 160 Message: 186

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT (that's 8:30 Sunday morning for the folks Down Under). We have a wedding today at the Kingdom Hall with a reception following, but we will be back in time for the net. We will also have visitors from McAllen, Texas, in the ham shack at net time. There is also a ham brother from Florida in town for the wedding who might possibly drop by around net time. He doesn't check into our net, but I keep trying.

An e-mail advising the frequency will be sent closer to net time, and we will continue to send this message to both the ECARN Yahoo Groups and regular e-mail for those who have not yet joined the Yahoo Groups page. I encourage any who have not joined yet to do so as soon as possible. If you want to join the group via the Yahoo Groups page, please send me an e-mail and I will send you an "invitation," which makes joining a one-click operation. The invitation has a box on the page that says "Join This Group."? All you have to do is click on the box and you're in!

If you have questions or need help with the process, please call or e-mail me and I'll walk you through it.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that also, let me know.

Thanks!

Hope to hear you all on the net tonight.

Charlie

Friends,

I may be late for the 14.307 net. Can someone be a back up net control for Sunday?

Net time is 16:00 MT.

Remember to turn clocks ahead if you live in a place where they think this is a good idea.

73,
Ralph WD0EJA

190. ECARN net for tonight 03/08/2014

Yahoo group: Area_5_ECARN_Group
Date: 2014-03-08 23:10:21 UTC
From: Charles D Young
Topic: 190 Message: 190

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT (that's 8:30 Sunday morning for the folks Down Under). Also remember to set your clocks AHEAD one hour tonight as daylight savings time begins.

An e-mail advising the frequency will be sent closer to net time. For those who want to get on early please start at 3.846 and go +/- as needed.

We will continue to send this message to both the ECARN Yahoo Groups and regular e-mail for those who have not yet joined the Yahoo Groups page. I encourage any who have not joined yet to do so as soon as possible. If you want to join the group via the Yahoo Groups page, please send me an e-mail and I will send you an "invitation," which makes joining a one-click operation. The invitation has a box on the page that says "Join This Group." All you have to do is click on the box and you're in!

If you have questions or need help with the process, please call or e-mail me and I'll walk you through it.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that also, let me know.

Thanks! Hope to hear you all on the net tonight.

Brothers and Sisters,

I am in the process of compiling an Area 5 ECARN directory.

If you would like to be included in the directory, please provide the following to me as a reply to this e-mail: Name, call sign, mailing address, phone number, congregation if you are associated with one. If you would rather not provide some of that information, please provide what you wish, but do respond to the e-mail so you are not left out of the directory.

If you choose to not be included in the directory, I would also appreciate your letting me know that.

Date: 2014-03-15 16:19:41 UTC
From: Charles D Young
Topic: 160 Message: 194

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT (that's 8:30 Sunday morning for the folks Down Under). We will start out on 80 meters at 3.846 +/- as needed. If the switch to Daylight Savings time messes up 80 meters we will switch to 40 meters as needed.

An e-mail advising the frequency will be sent closer to net time. Start looking for a frequency e-mail around 6:15 pm CDT.

We will continue to send this message to both the ECARN Yahoo Groups and regular e-mail for those who have not yet joined the Yahoo Groups page.

I encourage any who have not joined yet to do so as soon as possible. If you want to join the group via the Yahoo Groups page, please send me an e-mail and I will send you an "invitation," which makes joining a one-click operation. The invitation has a box on the page that says "Join This Group." All you have to do is click on the box and you're in!

This is an A-to-Z explanation of building a multi-band wire antenna, commonly called a FAN Dipole.

I have built several of these, usually 80, 40, 20 meters -- but other bands can be included.

Definitely good one to share with all the Ham brothers!

211. ECARN net for tonight

Yahoo group: Area_5_ECARN_Group
Date: 2014-03-23 00:08:37 UTC
From: Charles D Young
Topic: 160 Message: 211

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT, starting at 7.273 +/-. We have received a request or two to switch to 40 meters because, as long as we are on 80 meters, some brothers or sisters can not participate. As soon as I turned on the radio I saw 80 meters was extremely crowded.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that, let me know.

Thanks! Hope to hear you all on the net tonight. We'll be on in a few minutes trying to find a frequency.

216. Detroit International convention backup communications.

Yahoo group: Area_5_ECARN_Group
Date: 2014-03-25 14:53:36 UTC
From: ab8yt
Topic: 216 Message: 216

Hello Friends: This is Brian, AB8YT. I will be attending the first international district convention in Detroit in June, dates 6, 7 + 8. I will be working in the attendant department, and during a training meeting we had last Friday, it was mentioned that cell phones will be the main communication means used. In all likelihood, this will be perfectly fine. However, in case the cell system should go down, among other possibilities, it would be a good idea if those of us who are HAMs could bring a handheld radio with us just in case it might be needed. In order to know who would be going to Detroit in June and so we can have coordination of effort if needed, please email me at ab8yt@yahoo.com. Please let those friends who are HAMs but not on this groups email list know as well if they will be going to Detroit. Once we have a list of who will be attending, we can arrange for an ECHOLINK net sometime in May to discuss such things as what band and frequency to use as well as what experience you friends have had at large conventions that would be beneficial to our discussions. They are expecting around 45,000 at this convention!
Thank you friends. I look forward to hearing from you.
Take care.
73+agape.

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT. I need a volunteer for net control tonight.

We have 16 people that are going to be at our house at 5:00 CDT for supper and they are also going to be here for the weekend. They are all assisting our newest member of the congregation move to Breckenridge this weekend. Linda and I plan to check in and participate on the net but I want to be able to explain to our 16 guests what is going on and the "ham shack" is also being used as a bedroom.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that also, let me know.

Thanks!

Hope to hear you all on the net tonight.

Hi Frank,

You may be interested in the Area 6 ECAR net. It starts at 18:30 PT. Possibly you would be home by that time. They also have a net on Monday and Thursday at 18:30 PT. Frequency to start is 7.278.

You can contact Bill Hampy for details at billhampy@....

73,
Ralph WD0EJA

Dear Ralph,

This is Bill, K4GDR, in Atlanta. Our Sunday meeting time has changed to 5:30 PM so, have not been able to get home in time to join the Sunday evening net. I had a quick question for you -- do you know if any of the brothers will be attending the Dayton Hamvention? If so, do you know if there are any plans to get together during the event?

I am planning on attending (never been before) and wanted to visit with the brothers if any will be there.

Best regards
Bill Hurley

My father and I will be in Dayton. In fact, we'll have an inside commercial booth - Booth #BA0487, so be sure and stop by if you're there. We're very close to the ARRL's area, just around the corner from the DMR-MARC Amateur Radio Club's booth.

From: Charles D Young
Topic: 160 Message: 230

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT (that's 8:30 Sunday morning for the folks Down Under). Look for Ralph (WD0EJA), who will be net control for tonight.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that, let me know.

Thanks! Hope to hear you all on the net tonight. The frequency for tonight will be 7.277(+/-).

Charlie

From: Charles D Young
Topic: 160 Message: 231

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT (that's 8:30 Sunday morning for the folks in Perth, Australia).

I would like to ask Ken, (K3KEN) to suggest a frequency for the net, it seems we always pick a frequency that has an AM carrier right on top of him. After a frequency is defined we will put out another e-mail to the group. Right now I am monitoring 7.270.

Echolink will be up and running, if you have questions or need help with the process, please call or e-mail me and I'll walk you through it.

Thanks!

Hope to hear you all on the net tonight. We'll be on in a few minutes trying to find a frequency.

Hi Charlie,

What is your backup antenna if your main one goes down?
- Backup radio
- Backup power supply
- computer

What mode (CW, digital) o you think would be useful?

Do you know other brother ham's within 20 mile radius that you could set-up Field Day or any other station for practice?

One topic per week

236. ECARN net for tonight

Yahoo group: Area_5_ECARN_Group
Date: 2014-04-19 23:54:33 UTC
From: Charles D Young
Topic: 160 Message: 236

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT. Please start looking around 7.270 +/- as needed. In the interest of time we will not be sending out a separate e-mail for the net frequency. Please keep in mind that some brothers and sisters are at their Special Assembly Day and therefore will not be on the net tonight.

I would also urge all of you to go to w2bn.org and look at the information there. As a reminder the West Coast ECARN group meets at 6:30 PDT right after our net. Echolink will be up tonight on the W2BN node. I am standing by on 7.270 now awaiting other stations to join me.

If you have questions or need help with the process, please call or e-mail me and I'll walk you through it.

Hope to hear you all on the net tonight. Thanks !

Charlie

Brothers and Sisters,

It appears that the cancer Phillip Hollis-Watts has been fighting is winning the battle. A card shower from the Area 5 ECARN group would surely lift Phil's spirits. I am including in this e-mail an excerpt from his e-mail, as well as his mailing address, in case you'd like to send him an encouraging thought. I don't know what postage to Australia costs so you'll have to check with your local post office for that.

Charlie
K5BOH

Hi,
Been in hospital with cancer.
very ill, cancer out of control

238. ECARN net for tonight

Yahoo group: Area_5_ECARN_Group
Date: 2014-04-26 21:37:39 UTC
From: Charles D Young
Topic: 160 Message: 238

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT

We will be on 7.276.5 tonight for a try. The West Coast ECARN Group is supposed to meet on the same frequency
right after our net. It remains to be seen whether or not I will be on the air tonight, we are supposed to have storms,
lightning, and rain between 4 pm and 10 pm. But we will be there if we can.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that also, let me know.

Thanks!

Hope to hear you all on the net tonight. We'll be on in a few minutes trying to find a frequency.

243. ECARN Net for tonight--Message 3

Yahoo group: Area_5_ECARN_Group
Date: 2014-04-27 01:02:35 UTC
From: Charles D Young
Topic: 243 Message: 243

It appears that 7.276.5 was not a good pick for s frequency tonight. We possibly interfered with another QSO.
Weather and static crashes also played a BIG factor in a bad net tonight. We will revert back to 7.270 next Saturday night.

I copied WD5IOC, WD0EJA, K3KEN, KB5ZNP before pulling the plug on the rig because of lightning in the area.

See everybody next week.

244. Tornadoes in Area 5 ECARN

Yahoo group: Area_5_ECARN_Group
Date: 2014-04-28 04:26:10 UTC
From: Charles D Young
Topic: 244 Message: 244

Brothers and Sisters,

If you're watching the late news tonight, you are aware that tornadoes have struck in several spots in Oklahoma and Arkansas.

After 8 a.m. tomorrow (Monday), I will be in touch directly with brothers and sisters in those areas to gather information and updates. Please watch your e-mail and possibly monitor 14.307 tomorrow. I will do my best to keep you updated.

KTHV Channel 11 in Little Rock is reporting heavy damage in Vilonia and Mayflower, which are north and west of Little Rock. Both of these towns are lightning rods for tornadoes and in the last 20 years have been struck several times.

If any of you have any accurate information about brothers and sisters, or families of brothers and sisters, who have been affected by the latest storms, please let me know.

***Note to early morning text net participants: If any of you gain information via the text net (which is before I get up), please e-mail and/or call me. My phone is by my bedside.

Brothers and Sisters,

The brothers and sisters I have heard from in Arkansas all report no damage that they are aware of and no injuries among the brothers. That could change. That's just the information at hand at present.

I will send updates if and when I receive them. Thanks for your continued prayers and thoughts.

Hi Friends, Brian AB8YT here again. For those who will be going to the Detroit International convention on June 6 to 8, I was thinking we could get together on ECHOLINK at 7:00pm EDT on Saturday May 31 to discuss what portable frequency to use and other matters if needed. It should not take us too long to dicuss things. Please let me know if this would not work for you friends. If I don't hear from anyone to the contrary, I will meet with you on ECHOLINK at 7pm EDT on May 31.
73+agape.

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT

The topics schedule is open for anything. Topics of special interest may include : (1) the EF4 tornado that struck Central AR last week, as well as storms that struck MS. (2) any updates that may be available regarding the upcoming conventions. (3) updates on brothers and sisters suffering from illnesses. (4) any other topics.

Echolink will be up and running on the W2BN node. If you have questions or need help with the process, please call or e-mail me and I'll walk you through it.

The frequency will statr on 7.270 +/- as needed.

Thanks! Hope to hear you all on the net tonight.

Reply-To: ecarn@...
To: <ecarn@...>

Howdy,
Loved the thoughts behind all the letters/cards, I had me have a tear in the eye.
The ham radio network that our brothers have is truly unique.
One great event has been done, my YL has now been moved to do her ticket.
I am trying to hang on to the DA , as a my life’s goal. (and to witness to anyone that comes near me.)
I was having some chemotherapy and other this week at our hospital @ (Rockingham WA) and the head nurse of the the section , stated that you have a ‘perfect faith’ that gives you hope (she was ex British army) and she knows as a Jehovah’s witness that our standards are perfect, and we try to get there. (I have placed some literature with her, (and others there)
I am over whelmed with many cards and encouraging thoughts extolling JEHOVAH and His Kingdom.
Your enriched brother Phil VK6KPH and YL to be Maureen (reg pioneer still after 37 years)

254. ECARN net for tonight

Yahoo group: Area_5_ECARN_Group
Date: 2014-05-10 23:32:03 UTC
From: Charles D Young
Topic: 160 Message: 254

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT We will be on 7.285 +/- as needed.

We will continue to send this message to both the ECARN Yahoo Groups and regular e-mail for those who have not yet joined the Yahoo Groups page. I encourage any who have not joined yet to do so as soon as possible. If you want to join the group via the Yahoo Groups page, please send me an e-mail and I will send you an "invitation," which makes joining a one-click operation. The invitation has a box on the page that says "Join This Group." All you have to do is click on the box and you're in!

If you have questions or need help with the process, please call or e-mail me and I'll walk you through it.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that also, let me know.

I am already on 7.285 standing by.

Thanks!

Hope to hear you all on the net tonight. We'll be on in a few minutes trying to find a frequency.

Charlie

From: K5LA
Topic: 257 Message: 257

Hello Charlie,
Since, you are on the RBC maybe you know the answer. Do you know if the brothers setup a conference bridge (better know to us has as a phone patch) at the District Conventions? It sure would be nice if they do. It would be a great service for the sick friends and save the brothers present from having to record it on own.

Thanks Brother,

Floyd Chowning, K5la

258. Re: [Area_5_ECARN_Group] Question

Date: 2014-05-15 05:30:04 UTC
From: Glenn Hasdorff
Topic: 257 Message: 258

Floyd,
Instead of a telephone connection there is another arrangement so that friends who are unable to attend the convention for good reason can later listen to the program. Check with the elders in your congregation for details.
Thanks,
Glenn Hasdorff

259. ECARN net for tonight

Yahoo group: Area_5_ECARN_Group
Date: 2014-05-17 18:05:46 UTC
From: Charles D Young
Topic: 160 Message: 259

Brothers and Sisters,

This e-mail is to advise you that Linda and I will not be available for the net tonight. Linda's brother is here from West Virgina and we are going out of town to see other family members. I would encourage those who can to meet on 40 meters at 7:30 pm CDT.

Start at 7.270 +/- to look for a frequency. Look for Dave Kiebler, KB5ZNP as net control.

You can also send e-mail through the Area 5 Groups page. Please have a good time with the net and someone e-mail me a list of check-ins.

73's & Agape,

Charlie

Brothers and Sisters,

This e-mail is to advise you that Linda and I will not be available for
the net tonight. Linda's brother is
here from West Virgina and we are going out of town to see other family
members. I would encourage those
who can to meet on 40 meters at 7:30 pm CDT.

Start at 7.270 +/- to look for a frequency. Look for Dave Kiebler,
KB5ZNP as net control.

You can also send e-mail through the Area 5 Groups page. Please have a
good time with the net and
someone e-mail me a list of check-ins.

73's & Agape,

Charlie

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that also, let me know.

Look for us at 7.285 +/- as needed.

Thanks!

Hope to hear you all on the net tonight.

From: Charles D Young
Topic: 262 Message: 262

Brothers & Sisters:

It appears that I will not be able to get on the net tonight due to weather. It has been sprinkling, raining, and thunder and lightning since about 5 pm CDT here in Breckenridge. Current weather radar indicates a storm cell just west of Breckenridge now.

It is 7:05 pm CDT and there are thunderheads and lightning in the area now. If the storms blow through in time I will join the net late or join the Area 6 West Coast net at 8:30 pm CDT. For the Area 5 net I ask that any stations who can, PLEASE hold the net and associate with each other.

If weather keeps me off the air this week. I will see everyone next week.

Good morning friends,
I will be at the International Convention in Detroit, MI. July 25-27. I see from the conversations that some will be there in June. Anyone else that will be there in July? It would be nice to see you? Please let me know. I do know there will be about 4 or 5 JW hams from my local area at that convention as well.
Thanks

267. ECARN net for tonight

Yahoo group: Area_5_ECARN_Group
Date: 2014-05-31 23:39:07 UTC
From: Charles D Young
Topic: 160 Message: 267

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT (that's 8:30 Sunday morning for the folks Down Under).Please look for Dave Kiebler (KB5ZNP) who will be net control tonight. The frequency will be 7.285.

Some of you are using the Yahoo Groups page to talk about the regional and international conventions, and I want to encourage you to continue to do so. If you have not signed up for the Yahoo Groups page yet, please do so. If you need help with that, just call me. The convention season is upon us and those meetings will provide a nice opportunity for us to meet our ham brothers in person. Arrangements for meeting spots can be arranged in advance.

Phillip Hollis-Watts continues his valiant fight against the dreaded "C" word, but feels that he is losing the battle. He is dealing with pain and he and his wife Maureen can use our encouragement. Apparently he received a large amount of cards and e-mails after our last post and they meant a lot to both of them. Continue your encouragement, brothers and sisters, to Phil and Maureen and to any others you know are suffering in any form. If you know of something that needs posted to the net, let me know or go ahead and post it on the ECARN Yahoo Groups page.

Thanks to all of you for your participation and support of our efforts! Hope to hear you all on the net tonight.

268. Detroit International convention this week.

Yahoo group: Area_5_ECARN_Group
Date: 2014-06-03 03:46:49 UTC
From: ab8yt@...
Topic: 268 Message: 268

Hi friends, Brian AB8YT here: from the discussions on the Sunday ECHOLINK net it was decided that the best course of action for handheld use is to listen on 146.52 since we might not know of all the HAM brothers and sisters that might be at the convention with a handheld. This follows procedure in past years where the brothers would have a quick net during lunch and possibly a meeting at the lost and found although that might not be practical at Detroit. We could try and have a mini net on 146.52 at 1:00pm during lunch each day, after everyone has had a chance to eat first. It was also suggested to wear your callsign badge if you have one, again as in years past.
If the need arises to use our handhelds as in the cell sites go down, we can switch operations over to 147.430 after first checking in on 146.52. If your radio has dual receive capabilities, you could have both these frequencies punched in, ready to go.
Please bring a spare battery pack and higher gain duckie antenna if you have these as they would come in handy during a need to use our radios for emergency communications.
Keep in mind that we will have to go through Ford Field security check in each day. Our radios should not present any more of a problem than showing security the FM radios the friends would be using to listen to the program or our cell phones. In fact, perhaps your handheld may have FM band receive and would serve you double duty to listen to the program.
It would be a good idea to bring along a headset or earphone whether you use it or not as security would feel better to see that you have the means not to be disturbing others with your audio just like others using FM receivers are to use headsets or earphones when listening to the program broadcasts.
Please pass this along to friends who will be attending.
Take care everyone, and may we all be fully encouraged and recharged by the convention program!

269. ECARN net for tonight

Yahoo group: Area_5_ECARN_Group
Date: 2014-06-07 15:21:09 UTC
From: Charles D Young
Topic: 160 Message: 269

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT .

Please look on 7.285 +/- as needed for the net. Topics tonight may include:
(A) Upcoming International Conventions, (B) Recent adverse weather problems within Area 5,
(C) Status checks on brothers and sisters who have been ill lately. If anyone wants to add a topic
please let me know.

We may have visitors from McAllen, TX in the ham shack tonight. They are interested in ham radio.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that also, let me know.

Thanks!

Hope to hear you all on the net tonight.

Hello Brothers,

Please don't take this as complaining, but up here in NY, 7285 was
relatively quiet until exactly 00:30 (7:30pm CT), Net start time.
At that time an India broadcast station called "TWR India" starts up on 7280
with 250 Kw.

There is a web site :
http://shortwaveschedule.com/index.php?now=true

It shows all the shortwave stations transmitting at the time you access the
site.
All of the 40 meter broadcast stations are from 7200 on up.
When they transmit music, they are at least +-10 khz wide.
If we could choose a frequency between 7175 (+2.7khz for the lower sideband)
(the beginning of the general band) and less than 7190,
then the folks on the east coast that are getting clobbered by the broadcast
stations would be able to participate more reliably.

Ralf,
Thanks for the great explanation.
The AM stations have been an ongoing problem for me.
I heard You, K5YCM, K5TER, and W5IOC until the AM
station made listening impossible.
I never heard Charles.
We were the only two on W2BN as far as I could tell.
Maybe next time,
Ken K3KEN

Brothers and Sisters,

This e-mail is your invitation to join us tonight for the Area 5 ECARN net at 7:30 p.m. CDT.

The Detroit International Convention is in its second day! We will be on 7.287 +/- as needed tonight.

Join us tonight as we might get a report or two from convention attendees.

Echolink will also be up tonight on the W2BN node. If anyone needs help with that also, let me know.

Thanks!

Hope to hear you all on the net tonight.

Brothers & Sisters,

Linda and I are leaving for the the JW International Convention tomorrow. We hope to see many of you during the noon lunch hour. Please keep your cell phone handy for text messages during the noon hour.

If it is permitted we plan to gather during the lunch hour in the East Concourse, See Miller Elite Plaza on the separate e-mail I am sending out, (close to the baptism end of the field) and close to where the buses unload.
There are MULTIPLE lost and found departments so meeting at the lost and found would be a problem.
(as in which one do we meet?)

I can also receive e-mail on my phone and you may call either number listed at the end of this e-mail.

Hope to see all of you in Arlington !

Thanks for posting this Charlie. I hope it helps some brothers understand better what happens to a cancer patient. I added the photo of the mask I had to wear. It has been a week since the last treatment & things are just starting to improve. I will not be able to speak for a couple more weeks. I will have the TPN bag feeding me through the PICC line until I can eat again- also maybe 2 weeks. Thanks for all your prayers, Loren KG7KA

It is my hope that all Brothers and Sisters remember all who are enduring through the end of this system
in to the New World. Linda and I will continue our prayers. Please remember Loren, Phillip Hollis-Watts, and Margaret
Eastwood as they continue their battles with illness.

Hi Charlie. Sorry we didn't make it Sat after the session. The crowd was just too much for us making it very slow going in the scooter chair. Didn't see this email until this am. After braving the crowd Friday to get to you we basically stayed put. I know you can relate. Wonderful 3 days and great to see you and Linda and get to meet Don.

Keith,

Brothers and Sisters,

Charlie (K5BOH) is under the weather tonight and, actually, also under the covers. He is working with some medication adjustments and is waiting to get in to see the doctor. He has asked Dave Kibler (KB5ZNP) to moderate tonight's net, and Roger Nash (W5RDN) has promised to assist when he joins the group late. Please listen for them about 7:30 CDT.

The net will try to start on frequency 7.285 and go from there as necessity demands.

Keep the net going and enjoy the association. Thanks for all your support for Charlie and the net over the years. We all appreciate one another and yearn for the time when we can sit together around a campfire next to a stream, and maybe use our radios to talk to brothers in distant lands.

Enjoy tonight and think of us!

Brothers & Sisters,

Please join us tonight on 7.285 +/- as needed at 7:30 CDT for the Area 5 ECARN net. As the service year is winding down
some of us are having regional conventions or assembly days so we understand for those who are traveling.

Don Smith, K5TER will be showcasing his ham station this week and others will be showcasing their stations
in the weeks to come. Hope to see all of you on the air tonight. Some of us are already standing by on 7.285.

Date: Thursday, August 7, 2014, 4:46 PM

Hazel L Carpenter, K5HZL, died Thursday, August 7th at 7:34 AM. She died
peacefully at home, surrounded by her 3 girls. She fought a fine fight for the fight.

She loved Jehovah with all her being. She was a fighter. She lived
16 wonderful months, after a doctor told her she would be dead in 2 weeks.
Her one desire is for all her loved ones, to be there in Paradise, when she wakes up.

She was 82 years old.

Battled Leukemia for a year and other health issues for
months prior to that. She was a happy, witty, giving
person. She was truly a spiritual example for us
all. She will be missed by all who knew and loved
her.

She was a Regular Pioneer for 25 years and was invited to attend Pioneer School this month
for the 3rd time. She was looking so forward to it, especially since she and I were going
to be
able to attend together for the first time.

Her Memorial is set for Saturday, September 6th, at 2:30 PM., at the
Springtown Kingdom Hall.

She would be honored, if all who knew and loved her could attend.
The family sends their deep appreciation for the love, prayers, and support you us in
the past months.

Warm Christian Love and 73 to all.

Debbie Smith K5LDC and Don K5TER

303. Fwd: ECARN Net this week

Yahoo group: Area_5_ECARN_Group
Date: 2014-09-13 17:21:33 UTC
From: Charles D Young
Topic: 303 Message: 303

Subject: ECARN Net this week
Date: Sat, 13 Sep 2014 12:17:53 -0500
From: Charles D Young <charrlie56tx@...>
To: Area_5_ECARN_group@yahoo groups

Brothers & Sisters,

The Area 5 ECARN net will be tonight at 7:30 CDT. Please look for the net at 7.285 +/- as needed.
I will try to be on the air by 7:00. The Area 6 ECARN net will follow at 8:30 CDT on either the same frequency or close to it.
It had been suggested that we look at moving to 80 meters, however it looks like it would be best to stay on
40 meters until November

Your individual support is needed and appreciated. Please think of some topics you would like to have discussed during the net and e-mail them to me at any time.

As always, if you have any questions or comments or need help with participation on the radio or EchoLink, please call or e-mail and I will either help you or connect you with a brother who can.

Charlie

Except that's what the AMer's claim as theirs (7290-7295) and there's a
loud AMer there now.

Brothers & Sisters:

Linda and I are traveling to Houston this weekend to attend a wedding. We leave in the morning at 4:00.

Please have a good net and enjoy the time together. See everybody next week.

313. ECARN Net this week--9?27/2014

Yahoo group: Area_5_ECARN_Group
Date: 2014-09-27 15:13:21 UTC
From: Charles D Young
Topic: 313 Message: 313

Brothers & Sisters,

The Area 5 ECARN net will be tonight at 7:30 CDT. Please look for the net at 7.285 +/- as needed.
I will try to be on the air by 6:45. The Area 6 ECARN net will follow at 8:30 CDT on either the same frequency or close to it.
This weekend is the Texas QSO Party so frequencies will be crowded.

Your individual support is needed and appreciated. Please think of some topics you would like to have discussed during the net and e-mail them to me at any time.

As always, if you have any questions or comments or need help with participation on the radio or EchoLink, please call or e-mail and I will either help you or connect you with a brother who can.

Charlie

Thanks, Marlin. I also see that the K index was pretty high (http://www.n3kl.org/sun/noaa.html) about the time of the net. We're not that far away from the autumnal equinox, and solar storms are more common around the spring and fall equinoxes.

Maybe another 80m trial later --perhaps after the shift from daylight savings time-- would be good.

CHARLIE: I AGREE WITH DON (K5TER) MAYBE LATER IN THE SEASON, (colder weather) WILL MAKE A BIG DIFFERENCE. WE PROBABLY SHOULD CONSIDER ASKING A SELECTED FEW DIFFERENT FOLKS IN OUR GROUP TO LISTEN TO 80 METER FREQUENCIES WAY BELOW & WAY ABOVE 3843 KHz BEFORE & DURING THE NET TIME FRAME TO SEE IF WE COULD FIND A BETTER (CLEARER) FREQUENCY? I"M NOT SURE WHETHER THE WEST COAST FRIENDS WOULD HAVE TO STICK WITH THE FREQUENCY WE SELECT OR NOT. BUT IT WOULD SEEM TO BE GOOD IDEA AS THE FREQUENCY SHOULD BE USEABLE. NOT SURE ABOUT THIS BUT IT SOUNDS REASONABLE. WHAT OTHER IDEAS SHOULD BE CONSIDERED??

326. ECARN Net this week--10/25/2014

Yahoo group: Area_5_ECARN_Group
Date: 2014-10-24 17:49:36 UTC
From: Charles D Young
Topic: 326 Message: 326

Brothers & Sisters,

There will be some of the Area 5 Group gone to Circuit Assembly this Saturday. It is certain that Charlie (K5BOH), Linda (K5YGG) and Roger W5RDN will be gone to their respective assemblies. I believe that Don K5TER and Debbie K5LDC will be gone too, although it is not confirmed as of the writing of this e-mail.

I ask that the remaining Area 5 ECARN group members please hold the regular net at 7:30 CDT. Even though 80 meters was a great success last week, it has been suggested that we return to 40 meters until sometime after DST ends.

With that in mind, please meet on 7.285 +/- as needed. As usual the Area 6 Group will meet at 8:30 CDT after the Area 5 Net.

Your individual support is needed and appreciated. Please think of some topics you would like to have discussed during the net and e-mail them to me at any time.

As always, if you have any questions or comments or need help with participation on the radio or EchoLink, please call or e-mail and I will either help you or connect you with a brother who can.

See everyone next week!

Charlie
K5BOH

Hi Friends,

There is a big contest this weekend. QRM will be severe. I would like to start out on 14.307, but would like to keep the option of 17M if it stays open. Frequency I would suggest is 18.120.

Hope to hear you Sunday at 17:00 CST.

Your brother,
Ralph WD0EJA

As I understand it, they are legally permitted (it is contests that are not permitted) and there is no formal agreement against their operation, but many people frown on them because of the narrower band space on 17m. Maybe if it has an informal sound to it we won't have problems.

As I understand it, they are legally permitted (it is contests that are not permitted) and there is no formal agreement against their operation, but many people frown on them because of the narrower band space on 17m. Maybe if it has an informal sound to it we won't have problems.

Hi Ralph,

Is net operation permitted on 17 meters? Seems I got chased out of there once for that.

Les

That's also what I found after some searches for *'17 meter net'*. If we make it as much as a roundtable as is possible, and don't use words like "net" or "check-in", then we shouldn't have any problems. It might even go faster that way.

338. ECARN Net this week

Yahoo group: Area_5_ECARN_Group
Date: 2014-11-15 20:05:41 UTC
From: Charles D Young
Topic: 297 Message: 338

Brothers & Sisters,

The Area 5 ECARN net will be tonight at 7:30 CST. Please look for the net at 7.285 +/- as needed.
I will try to be on the air by 7:15. The Area 6 ECARN net will follow at 8:30 CST on either the same frequency or close to it.

THIS WILL BE THE FINAL WEEK WE WILL MEET ON 40 METERS UNTIL SPRING. NEXT WEEK WE
WILL GO TO 80 METERS FOR THE WINTER.

Your individual support is needed and appreciated. Please think of some topics you would like to have discussed during the net and e-mail them to me at any time.

As always, if you have any questions or comments or need help with participation on the radio or EchoLink, please call or e-mail and I will either help you or connect you with a brother who can.

From: Charles D Young
Topic: 339 Message: 339

Brothers and Sisters,

I do not want to cancel tonight's net, but a search of the frequencies all the way up and down 40 meters indicates they are jam-packed and we couldn't hear each other.

Therefore, I am moving the net to 80 meters, 3.843. If that is not successful, someone please call me on my cell phone to suggest a frequency.

I am standing by on 3.843 and cell phone.

Hi Ralph, K9HYL. I had gotten a message from you regarding a way to keep the JW Rendezvous group updated on frequency adjustments due to things such as nearby contesting or QRM. I had replied to your email but you had left a GMAIL address and since I hadn't heard back I wondered if this was wrong or if my messages were going into your spam folder.

One thing I had suggested was a group site like the one here on Yahoo, but wondered if the group would like something a bit more personalized. I have created a site at https://jwhams.net https://jwhams.net for your review. If you think the group would like to use it, go ahead and try it out.

Hello Brothers,

It's very kind of Justin, N8QVQ and John, W0PM to provide those websites! However, our longtime and very much beloved net control Ralph WD0EJA *cannot access the Internet. Only e-mail.*

That being the case, I cannot see how either jwhams.net or w2bn.org would work.

Echolink has been suggested in the past (W2BN node courtesy of W0PM). But the activity on Echolink is FAR less than it was in years past. (I've stopped using Echolink, at least for the time being.)
I've heard that our brothers in countries such as Australia (and NZ?) have moved from Echolink to Winlink. IIRC, they are among the countries (Germany is one of them) where amateurs are prohibited by law from discussing religious matters over the radio. Therefore, their nets are not on the radio. *I do not have any details. *But it would be wonderful to be able to join them, also.

(Some brothers {Darrow, W6EOE comes to mind} don't even have a computer. It would take a phone call.)

I humbly suggest that we continue to use this Yahoo Area 5 ECARN Group for frequency updates, just as we have been doing. But maybe someone has a better idea! Why not discuss that right here?

Warmest Christian love,
Mike Waters

If it isn't broke why fix it!

Why take a simple working system, complicate it and add unnecessary options (high tech)?

Ps: There is no JW on ECARN or Rendezvous. (Research on WT library to find the article on use of JW)

Margaret

It's good to hear from you. I hope that all is well.

The 2013/wt 11/15 pp 16-18 gives us and especially elders pointed direction on what we should be doing during this time of the end.
Also let me say this. I love ham radio and I can see myself getting back into it again. I might even keep my mobile equipment. But as for now and base on the makeup of our our congregation I have a lot of work to do and a short time to do it.
I trust that Jehovah will bless my efforts to simplify in this and other areas. I know that the group will continue in the efforts to support the friends in times of emergency .
2013 Watchtower 11/15
LESSONS FOR TODAY
16. Who today are represented by (a) Jerusalem’s citizens (b) “the Assyrian” (c) the seven shepherds and eight dukes?
16 The prophecy about seven shepherds and eight dukes has its major fulfillment in our day. The citizens of ancient Jerusalem were attacked by the Assyrians. In the near future, Jehovah’s apparently vulnerable people will come under attack from the modern-day “Assyrian,” whose intent will be to wipe them out. The Scriptures refer to that attack as well as the attack of ‘Gog of Magog,’ the attack of “the king of the north,” and the attack of “the kings of the earth.” (Ezek. 38:2, 10-13; Dan. 11:40, 44, 45; Rev. 17:14; 19:19) Do these represent separate attacks? Not necessarily. The Bible could be referring to the same attack under different names. What ‘secret weapon’ does Micah’s prophecy indicate Jehovah would raise up against that implacable foe—“the Assyrian”? A very unlikely one—“seven shepherds, yes, eight dukes”! (Mic. 5:5) The shepherds and dukes (or, “princes,” NEB) in this implausible army are the congregation elders. (1 Pet. 5:2) Today, Jehovah certainly has provided an abundance of spiritual men to shepherd his precious sheep, to strengthen his people for the future attack of the modern-day “Assyrian.”*Micah’s prophecy states that they will “shepherd the land of Assyria with the sword.” (Mic. 5:6) Yes, among ‘the weapons of their warfare,’ you will find “the sword of the spirit,” God’s Word.—2 Cor. 10:4; Eph. 6:17.
17. What four conclusions can the elders draw from the account we have considered?
17 Elders who are reading this article can draw some useful conclusions from the account we have just considered: (1) The most practical step that we can take to prepare for the coming attack of “the Assyrian” is that of strengthening our faith in God and helping our brothers to do the same. (2) When “the Assyrian” attacks, the elders must be absolutely convinced that Jehovah will deliver us. (3) At that time, the life-saving direction that we receive from Jehovah’s organization may not appear practical from a human standpoint. All of us must be ready to obey any instructions we may receive, whether these appear sound from a strategic or human standpoint or not. (4) Now is the time for any who may be putting their trust in secular education, material things, or human institutions to adjust their thinking. The elders must stand ready to help any who may now be wavering in their faith.
18. How might reflecting on this account benefit us in the future?
18 The time will come when God’s modern-day servants will appear to be just as vulnerable as the Jews trapped inside Jerusalem in Hezekiah’s day. At that time, may all of us draw

strength from Hezekiah’s words. Let us remember that with our enemies “there is an arm of flesh, but with us there is Jehovah our God to help us and to fight our battles”!—2 Chron. 32:8.
The Hebrew word translated “maiden” at Isaiah 7:14 can mean either a married woman or a virgin. Thus, the same word could be applied both to Isaiah’s wife and to the Jewish virgin Mary.
The number seven is used frequently in the Scriptures to signify completion. The number eight (one more than seven) sometimes represents an abundance

Thanks,
James

Brothers

Sorry it taken so long to get this list together. We have the CO this week.
Here are the major item that I have

Icom 718- $ 450 plus shipping
FT-857d. $600 + shipping
Ameritron AL 811 Amp w/ interface $600 + shipping 15m-160m
MFJ-962D att tuner. $275 + Shipping
MFJ-994B intellituner $250 + Shipping
Ham Sticks. 1 80m 2 40m and 1 20m $30 for all + Shipping
MFJ-259B antenna analyzer. $225+ Shipping
1 Little Tarheel II screwdriver antenna 6-80m
$300+ shipping
I tried listing the price below Ebay prices.

If someone would like to purchase the entire lot
I would be willing to let it go reasonable offer. We are supporting 2 pioneers you know.

Thanks,
James

Hi Ralph: Nice to hear of interest in monitoring the friends.I was wondering though if that sister's Grundig radio has SSB capability. Basic shortwave radios only have AM mode along with FM broadcast and maybe VHF weather, so she would not be able to hear us. Hopefully it does have SSB.

There are some high-end Grundig SW rados that --so I've read-- do a fair job on SSB on the ham bands. One --the G3-- even has a synchronous detector that apparently automatically locks dead-on to an SSB signal.
http://www.eham.net/reviews/detail/8447

The main issue I foresee is a lack of a good outdoor antenna (such as we hams usually use). Using it inside her home with the built-in antenna (or even an end-fed wire) is likely to pick up all sorts of RFI from switching supplies and home appliances. (Of course, the same issue could occur using ANY receiver without an antenna mounted outdoors.)

Just my $0.02 worth.

600. Need JW Library for Windows

Yahoo group: Area_5_ECARN_Group
Date: 2016-05-26 00:49:12 UTC
From: Mike Waters
Topic: 600 Message: 600

Does anyone have an executable install file for JW Library for Windows? Apparently, the current version runs on Windows 7 and I'd really like to install it on this Compaq Presario CQ62 laptop PC.

I tried to download the JW Library app from the Microsoft Store, from the link at https://www.jw.org/en/online-help/jw-library/windows-8-windows-phone-8/. However, the Microsoft Store (which apparently is currently in complete control of downloading that app) detects that I'm running Win7 and won't let me download it. *It appears that if I could download it, the current version would run on Win7.*

If you have the install file, please contact me offline. Thanks in advance. :-)

I do not have a tablet or any other mobile device.

Windows JW Library runs as a Wndows phone/tablet app. On PCs, only Win8 and above can run Windows tablet apps. Win7 native mode does not support Windows tablet apps.

Having said that, I did a Google search and found the following link:

http://avalabs.blogspot.com/2014/01/how-to-use-jw-library-in-windows-7.html

The technique used here is to setup "Android" in a virtual box on your Win7 PC. Then from within Android running on the virtual machine, you can access App Stores and install and run android apps, including JW Library.

So, it is possible...

The next Windows release of JW-Library will run only on Windows 10. Using an Android emulator, like Blue Stacks, http://www.bluestacks.com/ with versions of Windows below 10 can work, but can also be a challenge.

The easiest solution is to purchase an inexpensive Android tablet. (I won't go into all the reasons why Android is a better choice, but ease of use, support and value are prime.) If you get one with an expansion-SD-card-slot you can put a 32 or 64 gig mini-SD card in it. JWL will save all the music and videos to the SD card if you go into JWL's settings.

Computers: I recently purchased 7 laptops to be used by our congregation to do letter writing one day a week at the KH. They are all used Dell D-600 series purchased on Ebay for around $75.00 each. They all had valid Windows 7 COA licenses, so I upgraded them all to Windows 10 at no charge. I also bought a couple of desktop Dell computers and upgraded them to Win10. They all run JWL with no problem. Be careful and read the fine print, but for under $100 you can 'have it all' at home.

Tablets: For example, I recently saw an RCA 7" quadcore 16gb tablet at Walmart for around $60. Personally, I do everything on my Samsung Note 3 Android phone with 5.5" display. My wife uses an Acer Android tablet with 10" screen. Many folks will want a tablet larger than 5-7" so consider a 9" or 10" size.

Don, K5TER

Thanks for all the advice! AE7KU tried Mont's advice below, but it was very slow. I think I'm going to look into getting an Android tablet, now that Don explained what I needed to know. :-)

Annual Pre-Hurricane Season WX4NHC Station Test Set for Saturday, May 28

Now in its 36th year, WX4NHC <http://www.wx4nhc.org> at the National Hurricane Center (NHC <http://www.nhc.noaa.gov>) in Miami, will conduct its annual Station Test on Saturday, May 28. The event, which gets under way at 1300 UTC and wraps up at 2100 UTC, is conducted each year in advance of hurricane season.

http://www3.arrl.org/nl/al/image/wx4nhc%20qsl%20front%20web.jpg"The purpose of this event is to test Amateur Radio Station equipment, antennas, and computers prior to this year's Hurricane Season, which starts June 1 and runs through November 30," said WX4NHC Amateur Radio Assistant Coordinator Julio Ripoll, WD4R. "This event is good practice for ham radio operators worldwide as well as National Weather Service (NWS) staff to become familiar with Amateur Radio communication available during times of severe weather." The station also takes advantage of the test to perform operator training.

The annual Station Test is not a contest or simulated hurricane exercise. WX4NHC will make brief contacts with participating stations to exchange signal reports and basic weather data. For example, stations may report "sunny" or "rain" or "cloudy" in describing the conditions at their locations.

Ripoll said WX4NHC will be active with various modes on HF, VHF, and UHF, as well as 2 meter and 30 meter APRS, and it will be available via Winlink <mailto:wx4nhc@...> (subject line must contain "//WL2K"). "We will try to stay on the Hurricane Watch Net frequency of 14.325 MHz most of the time," he said.

WX4NHC also plans to be on the VoIP Hurricane Net <http://www.voipwx.net/> from 2000 until 2100 UTC (IRLP node 9219; EchoLink WX-TALK Conference node 7203). In addition, the station will be active on South Florida VHF and UHF repeaters. Read more <http://www.arrl.org/news/annual-pre-hurricane-season-station-test-at-wx4nhc-set-for-may-28>

Subject: Re: [Area_5_ECARN_Group] Need JW Library for Windows

Windows JW Library runs as a Wndows phone/tablet app. On PCs, only Win8 and above can run Windows tablet apps. Win7 native mode does not support Windows tablet apps.
Having said that, I did a Google search and found the following link:
    http://avalabs.blogspot.com/2014/01/how-to-use-jw-library-in-windows-7.html
The technique used here is to setup "Android" in a virtual box on your Win7 PC. Then from within Android running on the virtual machine, you can access App Stores and install and run android apps, including JW Library.
So, it is possible...
Regards,

Mont

Does anyone have an executable install file for JW Library for Windows? Apparently, the current version runs on Windows 7 and I'd really like to install it on this Compaq Presario CQ62 laptop PC.

I tried to download the JW Library app from the Microsoft Store, from the link at https://www.jw.org/en/online-help/jw-library/windows-8-windows-phone-8/. However, the Microsoft Store (which apparently is currently in complete control of downloading that app) detects that I'm running Win7 and won't let me download it. It appears that if I could download it, the current version would run on Win7.

If you have the install file, please contact me offline. Thanks in advance. :-)

I do not have a tablet or any other mobile device.

I couldn't transmit, but I heard it! Nice net. I don't think there was a single station that I couldn't hear, even with the lightning crashes. Must be the lack of sunspots, as Steve mentioned.

Ditto for the Area 6. Bill is over S9 here in SW MO right now.

Hope to see you all on 20 tomorrow.

Dear Brothers + Sisters:
The annual picnic this year is on Sat. Sept. 3.The location is shelter #2 at Grand Vue Park, 250 Trail Drive, Moundsville, WV.This is the same place that we have been using the last few years. It is a great location high up in the hills with a super view.The shelter area can hold up to 150 people, but the most we usually have is about 35, so there is room to spare.Although the picnic has a HAM radio theme,we are theocratic friends first, so please pass this info around to the friends in your various areas who are not on the ECARN mail list.Please note that the picnic is on Labor Day weekend, so that would help with more time for travelling.Bill McGuiness, W1GH, has map detail that he can send out if you request him at bill49murf@gmail.com.The park's web site is www.grandvuepark.com.

627. 20 meters even worse than usual today

Yahoo group: Area_5_ECARN_Group
Date: 2016-07-24 22:59:42 UTC
From: Mike Waters
Topic: 627 Message: 627

Hello friends,

How has 20m been for you lately? In recent months, I have great difficulties hearing anyone on the Rendezvous net. The exceptions are --on some Sundays-- KT4NU, K1QZ, and sometimes one other station. I can hear some West coast stations, but the past several weeks, they cannot hear me. (I'm not on every single week).

It used to be a lot better (at least every so often); but week after week, month after month, seems to be a waste of time. Is it just me, or are others experiencing this?

I see that propagation is worse today than usual (http://www.w0btu.com/propagation.html). I can barely hear K1QZ (Steve's usually loud!), and only one station on the West coast. After so many weeks of trying, I'm thinking of giving up the 5:30 to ~7:30 CST slot and do something more productive until things change.

In any case, I'm listening now with the amplifier tuned up and with multiple low-noise receiving antennas. :-)

Warmest Christian love,
Mike Waters

We need to set up an echolink system. I have a couple of nets here that have folks check in from all over the country. Check NARRI.ORG for details. Local VHF and UHF repeaters are connected and you8 can check in using a smartphone or tablet.
Please visit my web site for computer helphttp://www.bear-it.com/ is the new addressPlease visit B's Embroidery for fine giftshttp://www.bsembroidery.net/(not case sensitive- just using upper case for emphasis)Be sure to use the dot net, not dot com

  Hello friends,

How has 20m been for you lately? In recent months, I have great difficulties hearing anyone on the Rendezvous net. The exceptions are --on some Sundays-- KT4NU, K1QZ, and sometimes one other station. I can hear some West coast stations, but the past several weeks, they cannot hear me. (I'm not on every single week).

It used to be a lot better (at least every so often); but week after week, month after month, seems to be a waste of time. Is it just me, or are others experiencing this?

I see that propagation is worse today than usual (http://www.w0btu.com/propagation.html). I can barely hear K1QZ (Steve's usually loud!), and only one station on the West coast. After so many weeks of trying, I'm thinking of giving up the 5:30 to ~7:30 CST slot and do something more productive until things change.

In any case, I'm listening now with the amplifier tuned up and with multiple low-noise receiving antennas. :-)

Warmest Christian love,
Mike Waters

Loren, Echolink is a great idea!

A year or so ago, I made a big case for Echolink; but only a few did it. I finally moved the computer I was using for Echolink during the JW nets from near my shack to a storage room.

The friends in Australia use Winlink. I mentioned that also, but there was little interest.

In any case, Echolink requires that two UDP ports be manually opened our router's firewall, and not everyone is tech-savvy enough to do that. See www.echolink.org/firewall_IPTables.htm. I think Winlink might be easier, but I forget the details.

I got a private email last week that said:

> Why not work with the friends who are set up with radio email to see if we
> could all be reached by using 20 meters as the input freq.
>
I'm not sure how that would work. Sounds like he knows something I don't?

Enough said. I am not suggesting that we give up 14.307. Hope to see you all on the Rendezvous net tonight. :-)

Warmest Christian love,
Mike

From: n8mus@...
Topic: 633 Message: 633

Brothers and Sister,
I am on 14307 right now and only copy KC4NU on my radio I am using WEBSDR and one in San Francisco so filter it for 20m and North America When I do that the San Francisco SDR is the top one on the list.

LO WebSDR HF receiver system. At Lobitos Creek on the Pacific coast south of San Francisco, CA

Hope that help and there are others across the country as well. This one seems to be working for me.

73

Jon

This is a wonderful idea!!!

I could not hear a soul tonight on any of the 20m SDRs in the attached screenshot. And I could only hear K1QZ and KT4NU (and --just now-- a couple of others) direct.

Visit http://www.websdr.org/ and type in the frequency that the friends are on, for the current active SDRs.

Warmest Christian love,
Mike

Stations I copied on the Web sdr San Francisco link tonight"

KT4NU Light but Q5 copy, Stronger direct.
W5RDN great copy on the SDR no copy direct.
K4KID great copy on SDR no Copy direct
W0BTU good copy on SDR no copy Direct
W8MNN good copy on SDR and Better Copy Direct. Q5 either way.

I must have come on after K1QZ left as I never heard him mentioned. I usually copy Steve direct just fine.

Mike,

Nice Screen shot, yes the one I was hearing many on was the very top one in the shot.

Just this morning I was listening to some guys on 40m and they were using that San Fran SDR to copy each other. Most could not hear each other direct.

So I thought I would try it tonight and it worked for most. At least made it possible to operate. I could hear you fine on the web but not on my radio.

From: jon greenwood
Topic: 633 Message: 640

Roger,
Yes this is totally dependent on having an internet connection. Just as Echo-link, or any of the other solutions mentioned are.This was just a thought for some that have internet to hear more of the group.
Could this be used in a disaster situation? Yes.

I agree that for the purpose of emergency communication the radio would be likely the only option, in a disaster area. But for those outside a disaster area with radios that can't copy a station in a disaster area this could be an option to hear them VS no copy.

To illustrate: I had zero copy on you on my radio but you were loud in San Francisco. So I copied you fine on the Radio located there over my internet connection. So even if you had no internet connection in Texas in a disaster you could still be copied far away by others listening to you over the WEB. by SDR's located outside the disaster area. Obviously a relay station that you could copy would still be needed. So even in a disaster this could be an additional tool that might make a difference between communication and no communication. For stations outside a disaster area with internet connection what this is doing is giving an option to listen to an antenna in a different location.

In this scenario a relay station would still be needed but would only need to relay one side of the communication VS both.

No SDR radio is required to listen to the WEBSDR radios, But a computer and internet connection are.

I have just discovered this option and since I have a computer and internet connection it costs nothing to use it. It was nice to be able to copy most everyone, even if it was over the internet connection.

Topic: 648 Message: 648

Dear Friends: This Saturday, the 3rd, is our picnic at the Grand Vue Park in Moundsville, WV.
Usually I get to the park around "9ish" to start setting up. I will be putting up an 80m dipole that
I will use with an antenna tuner for 20m, 15m, etc.
Hopefully I will be set up and ready to go between 10:30 and 11:00 EDT or 14:30 to 15:00 UTC.
After I am ready to operate, I will log on to W2BN ECHOLINK site using my Android phone to text my
operating frequency and when I change bands etc. I would recommend all those that can to log in as well
so as to get live updates or to recommend a frequency to try.
I will also send updates using this groups email for those who can't log on to ECHOLINK, but it will be a slower
way to get the updates.
So, if you can come to the picnic, please join us. If you can't join us in person, please join us on the air.

73

Hallo Harald,

here is the actual frequency list for europe:

All times are UTC
(21.120) 21.307 SSB weekdays 12:00 (World Net)
18.145 (18.160) SSB Monday, Friday 12:30 (World Net)
14.307 SSB Daily 13:00 (Once or twice a month, all together)(World Net)
10.134,5 CW Monday 18:00 UTC (WINTER 19:00 UTC)
7.075-7.175 SSB Daily 19:00 (Once or twice a month, all together)
3.750 SSB Monday, Friday 20:00 (not in Summer)
(all together must be announced in E-mail, to avoid big contest).

attached is the actual list of the brothers.

I had difficulties with sending the mail yesterday. Your safed mail adress had an (caused on my own :-) failure, hi. Hope it is ok now...

73 de Lars

Greetings,

Art Larson, N0ART sent me this. A very basic 16 channel XCVR for Amateur Radio. 5 watts and an excellent price.

For those working in local emergency communications, this may be a good item for folks that want a very simple radio to use.

73,
Ralph WD0EJA

Actually Ralph these are only 2 watt radios (not 5) that operate like walkie talkies. The difference being that they can be programmed for any freq in the 440 range and require a ham license to operate unlike walkie talkies. Also you cannot change the freq in the field, only the channels you program which must be done on a computer. Nice that they are cheap but for most operations its nicer to have the keypad type for just a little extra money. I'm sure they have a place where they serve a purpose but not for most hams. Hi Frank,

Had to work on the car. I will monitor 14.307 currently.

Hi All This is a update as I have it from some of the Local Brothers and Sisters.The Assembly Hall installed hurricane shutters,all is well with the building,the grounds are a mess.So they are asking for a large group to come help as they have assemblies coming up.Palm Coast Bethel. the information I have is only that the power was off and made still be off? I am not sure about the power,The Brothers at Assembly-Hall installed a large back-up power generator,so not sure about Palm Coast?Only that the local Friends are out of power as of last night.No reports on Jacksonville other then one off the local Brothers as a picture of a shark swimming by there friends house.That is all.

684. Fw: Emergency Radio Test

Yahoo group: Area_5_ECARN_Group
Date: 2016-10-29 01:20:14 UTC
From: isotronantennas
Topic: 684 Message: 684

Greetings friends,

On November 5th the described test will take place. The local communications will be conducted on HF, VHF and UHF Commercial frequencies. This will take place in the morning. Location is the Denver area.

At 13:00 MT they will get on 7.242 Mcs.

At 13:30 MT they will get on 14.307 Mcs.

This will be from a portable location.

Any that are available to make contact with Art, N0ART, please feel free to join us.

I will post his reminder next week also.

73,
Ralph WD0EJA

Hello Everyone, Art Larson here. I was wondering how many of you would be available for a test of our Disaster Relief Communications System on Saturday November 5th 2016. This may be as early as 7:30am and no later than 3:00pm.

We are licensed by the FCC in the Continental United States, Hawaii, Alaska and the U.S. Territories. We now have permission from the City of Lakewood to set up our mobile system at the Blue Star Memorial look out, located on Colfax. Some of you will asked to go to Look Out Mountain, some of you will be asked to operate from your home location. Others will be asked to go from one specific location to another. We will furnish all the equipment you need.

Please let me know if you are available and interested by the end of this weekend and I will send out more details accordingly.

Thanks - Art Larson

The commercial frequency exercise will be for the Denver locality. It is unlikely that I can hear any of it here.

However, when that is done, all are welcome to try 7.242 at 13:00 MT and then, 14.307 at 13:30 MT.

Greetings,

This is a reminder of the activities planned for today.

There will also be a net tonight at 19:30CT or 00:30Z on 7.285.

73,
Ralph WD0EJA

Subject: Fw: Emergency Radio Test

Greetings friends,

On November 5th the described test will take place. The local communications will be conducted on HF, VHF and UHF Commercial frequencies. This will take place in the morning. Location is the Denver area.

At 13:00 MT they will get on 7.242 Mcs.

At 13:30 MT they will get on 14.307 Mcs.

This will be from a portable location.

Any that are available to make contact with Art, N0ART, please feel free to join us.

I will post his reminder next week also.

73,
Ralph WD0EJA

Subject: Emergency Radio Test

Hello Everyone, Art Larson here. I was wondering how many of you would be available for a test of our Disaster Relief Communications System on Saturday November 5th 2016. This may be as early as 7:30am and no later than 3:00pm.

We are licensed by the FCC in the Continental United States, Hawaii, Alaska and the U.S. Territories. We now have permission from the City of Lakewood to set up our mobile system at the Blue Star Memorial look out, located on Colfax. Some of you will asked to go to Look

Out Mountain, some of you will be asked to operate from your home location. Others will be asked to go from one specific location to another. We will furnish all the equipment you need.

Please let me know if you are available and interested by the end of this weekend and I will send out more details accordingly.

Thanks - Art Larson

505-486-9377

Greetings,

Net tonight. We are going to try 3.965 Mcs. At 19:30CT or 01:30Z.

With the ECARN all one group we will see how this works out.

73,
RB

Anybody on tonight? I didn't hear a peep.

3.965 usually has some severe wideband QRM. I hear it on my NE Beverage. I know that it has bothered Steve, K1QZ and others on the east coast. I wonder if there's a better 75m frequency?

Just my $0.02 worth.

73, Mike

75m was in poor shape. You didn't miss anything, Ralph. There was only KD0APS and myself. I think Sam heard one other brother.

It was more than just a long skip zone; even the usual broadband noise from the NE wasn't that strong tonight.

I don't have my 160m TX antenna up, but from what I could tell by listening on my Beverage antennas <http://www.w0btu.com/Beverage_antennas.html>, 160 meters was in better shape! But 75m is better now, too.

Eventually, the sun will calm down, and conditions will get better! :-)

Greetings,

I am sure missing you all.

How about if next week, if the band is dozing on 20M, that we start the net at the bottom of the hour 17:30 CT on 7.285? There is a BC at 7.290. However it may be far enough away for us to use. Any other suggestions is welcome.

73,
RB WD0EJA

I also now hear K8YOY in Florida.

Yes! 7.242 or 3.853 is a great idea, Steve!! (I can only get on 75m, but
let's go with whatever is best for everyone.)

FYI to all the friends: don't forget we can listen to the Rendezvous net on
several free WebSDR receivers. http://www.websdr.org/
I do that about every other week; an SDR in California and another in NJ
work the best at my MO QTH .

These iare my suggestion when the band condition is bad

What are yours?

Start at 14.307MHz if band is closed, go to 80 mtr (3.5875MHz) if no contact try 40mtr (7.248MHz)

This way we might get together.

Another suggestion is:

At top of the hour 14.307

15 min pass the hour - 80mtr

30 min pass the hour - 40mtr

We may not be able to get everyone but if 20mtr is closed we are not going to hear anyone anyway. We will have at least some get together. This is why we have so many bands to keep communications going.

The Area 6 and the Area 5?

73 Mike

Greetings,

I am sure missing you all.

How about if next week, if the band is dozing on 20M, that we start the net at the bottom of the hour 17:30 CT on 7.285? There is a BC at 7.290. However it may be far enough away for us to use. Any other suggestions is welcome.

73,
RB WD0EJA

These iare my suggestion when the band condition is bad

What are yours?

Start at 14.307MHz if band is closed, go to 80 mtr (3.5875MHz) if no contact try 40mtr (7.248MHz)

This way we might get together.

Another suggestion is:

At top of the hour 14.307

15 min pass the hour - 80mtr

30 min pass the hour - 40mtr

We may not be able to get everyone but if 20mtr is closed we are not going to hear anyone anyway. We will have at least some get together. This is why we have so many bands to keep communications going.

Thanks! Great suggestions, brothers!!! *This discussion makes me smile.* :-)

We are on the downward slope of the 11-year sunspot cycle, and we are nearing the bottom of it. Generally, that means that the higher HF bands (20m and higher) are poor and the lower bands (160, 80, and sometimes 40) are better. That's just a fact. That means --as we all have experienced for many months now on the Sunday evening 20m JW Rendezvous net-- that we are often going to continue to experience very poor band conditions where we have great difficulty hearing the majority of the friends on the net.
If we want to have a weekly net where we can all hear each other, we need to consider other bands besides 20 meters. That was the consensus this evening.

The exact alternate frequencies can be settled on later, but I think that this general concept is a good one. Brothers and sisters, please let us know your opinions, *whether or not you agree.*

1. On the Sunday night Rendezvous net, always start at 14.307.
2. If 20m is too long (long skip zone) and many of us can't hear one another other (like it has been for months), then we'll all go to 75m 15 minutes later.
3. If 75m is too long, then switch to 40m 15 minutes later.
4. If that doesn't work, then go study and wait for the next JW net. ;-)

If and when we DO switch frequencies, then the new frequency should be posted right here on this ECARN 5 group, so that everyone connected to the Internet will know where we all are.

I highlighted K1QZ's comments in red below. Any comments on those, or mine?

Somebody please correct me if I have something wrong (etc.) here.

*And no one should feel too insignificant or unqualified to add their $0.02 cents worth. Please, let's keep this discussion going among the ham brothers and sisters, can we? *
Proverbs 11:14 - When there is no skillful direction, the people fall, *But there is success through many advisers.*

Tonight, I told Katie (XYL KD0LAJ) that I needed her help putting up more antennas here, so we can operate 160 through 15, and not just 75. :-)

Warmest Christian love,
Mike Waters

Hello friends, Brian AB8YT here: We must keep in mind that not only are we on the downward slope of the present solar cycle(the peak was in 2013 or maybe 2014 depending on who you ask. That means another 2 or 3 years before the bottom), but we are in the shorter days time of year in the northern hemisphere. So if possible we could try to meet earlier on sunday when 20m might still be working. If that cannot be done or 20m is still not that great at an earlier time, then perhaps we could try 40m next as that band works better in the early evening. If that still will not work then we could try 80m since it usually works better at night.Regarding 40m, if you go to bandconditions.com, the graphs for which bands are the best throughout the day have shown that 40m has been the best performer over the other bands.

I agree, start the net early. This will help those on Eastern time particularly. Myself and no doubt others have a conflict with our meeting times. Therefore, Frank, take it away. I will be on morning meetings in January.

What do you think? I am favoring 7.191 or 7.188 for our 40M frequency. It appears that the net on 7.191 is not active at this time. No BC carriers and it is OK for General class.

Greetings,

Net tonight at 19:30 CT or 01:30 Z on 3.965 Mcs.

For Sunday, the Rendezvous Net. Some wanted to start early on 14.307 Mcs. This will give more usable time on 20M. Normal time is 17:00 CT. You might try 16:00 CT. I can not make it until later.

Also, if the 20M band fails, see if 7.191 + or - will work. It should be clear of BC stations.

Hello Bothers,

I hate sending this type of email, and since I don't know all of you personally, but, you were on Ken's email, I'm just replying all here.

I got a call from Jesse, his son last night, and Ken's health is pretty grim. They're just keeping him comfortable during his last day's here. Jessie told me he sleeps about 2 hours at a time, and is away two hours. He 's been accepting phone calls at the hospital, but, Jesse asks that you text him, (Jessie) first to make sure he's up to it.

On top of that Ken's wife was just diagnosed with terminal cancer. So, the family has sure been hit with a one two punch here. Many prayers are needed.

I'm not sure all who Ken knew from our network of friends, but, I know he knew many more of the brothers than I knew. If you could pass this information on, it would be helpful.

Here is contact information at the hospital.

He's at Alaska Regional Hospital Room 624.
(907) 264-1222

Before calling, please get the all clear from Jesse. You can text him at (907) 748-2200. Leave your name, and call when you text so he knows who you are.

Regards,

Sam Roffe N7FDU

Good Evening Brothers. Some of you replied directly to me, and I appreciated that.

I’ve been in contact with Jesse about every day to see how Ken is doing. He’s home now and comfortable.

He has his family around him, and they’ll answer the phone if you call, and will update you as they can, and if able talk to him, he sleeps a lot, so I have heard. I had a chance to talk with him on Sunday Evening, and he trying to keep a positive spirit, and accepting the inevitable with grace.

So, here is his information: Ralph, will you post this on the Yahoo Group?

You may call anywhere between 9-9 Alaska Time, and you can ask if Cherry or Ken are up for a call.

(907) 338-4007

Regards,

Sam N7FDU

Please share the list. I would like some rather high-end (HP, Agilent, or equivalent) to calibrate a Softrock SDR and Linrad.

- Pulse generator, that can generate 1 ns pulses
- Signal generator, with programmable stepping feature that covers HF
- Function generator, that can generate clean square waves

Thanks and 73,
Mike

Did I miss the net? I am on CT, and here is what my time shows; is one of those clocks off? I am easily confusicated, but Google seems to agree with the UTC clock.

73 Mike

Net on Sunday at 17:00ET on 14.307. Dead band alternate is 7.191 +/-.

Greetings,

Net tonight at 19:30CT or 01:30Z on 3.965 for the ECARN.

Net Sunday at 15:00ET on 14.307 for the Rendezvous Net. Alternate frequency is 7.191. With the longer daylight, 20M should be working better.

73,
Ralph WD0EJA

I think a net needs to remain on at the old time, too. Although after all of the changes, I'm not sure what the 'old time' was. Was it 00:00 UTC? Also, instead of using a mix of UTC and ET and CT, in emails, how about if we just use UTC? It's awfully easy to get confused when using all of these, instead of just UTC.

I've heard a net on 7192 at around 2300 UTC, plus or minus that time, so maybe it might work better to move slightly off of that frequency? Last night, it sounded like 7186 was pretty clear. Maybe someone can confirm that this frequency might be better or suggest another one?

Greetings,

Here is a suggested schedule for the ECARN and Rendezvous Net. Let me know if you no like.

ECARN DURING STANDARD TIME.

01:30 UTC SATURDAY, 3.965 MCS

RENDEZVOUS NET DURING STANDARD TIME.

22:00 UTC SUNDAY, 14.307 MCS

ALTERNATE FREQUENCY IF PROPAGATION IS POOR ON 14.307 MCS.

7.191 + OR -, PREFERABLY MINUS. SUNDAY

73,
Ralph WD0EJA

I think a net needs to remain on at the old time, too. Although after all of the changes, I’m not sure what the ‘old time’ was. Was it 00:00 UTC? Also, instead of using a mix of UTC and ET and CT, in emails, how about if we just use UTC? It’s awfully easy to get confused when using all of these, instead of just UTC.

I’ve heard a net on 7192 at around 2300 UTC, plus or minus that time, so maybe it might work better to move slightly off of that frequency? Last night, it sounded like 7186 was pretty clear. Maybe someone can confirm that this frequency might be better or suggest another one?

Thanks.

To All: I would like to meet at the old time but on 40 or 80 mts. 40 we could use 7.190MHz and 3.853MHz for 80mtr.

Any other ideas welcomed.

Not that I could hear, Steve. There was one loud W6 just after 5PM CST that briefly said something to Ralph (who I couldn't hear), but after that 14.307 +/- were busy with DXers and contesters.

7191 +/- has been busy, too, *but I just heard Ralph at 7.1915.*

Not that I could hear, Steve. There was one loud W6 just after 5PM CST that briefly said something to Ralph (who I couldn't hear), but after that 14.307 +/- were busy with DXers and contesters.

7191 +/- has been busy, too, but I just heard Ralph at 7.1915.

I was wondering if a 40 meter frequency up higher (than 7191) might be better. It's usually pretty crowded around 7191 in the evenings, but up around 7290 to 7295 appears to be less congested.

We used to be there. Does anyone remember why we moved?

In any case, let's discuss this before we move there. In some areas, that may be a bad spot.

John,

> We used to be there. Does anyone remember why we moved?

I think I remember:

- *Hams operating AM*. 7290 to 7295 has long been popular with AMers.
- *Foreign commercial broadcast stations*.
CRI (Chinese language lessons, anyone? ;-) is now S8 to the NE at my QTH in SW MO.

The friends in the NE USA and E Canada will be most affected by commercial SW broadcasting. That is the very reason that we moved to the present frequency on 75m. K1QZ in MA --and others-- often experienced severe QRM from a foreign BC station on the previous 75m ECARN frequency.

Keep in mind that we are still about 3 years from the solar minimum. That means 20m and 40m will deteriorate even further and will become even less useful for our nets. *75 and 160 improve during a solar minimum.* However, 75 and 160 often have bad summer QRN. *Name your poison!* :-)

More food for thought: if there are simply no frequencies available in the General class portions on a given day, many have Advanced and Extra privileges. We ought to have a plan in place for that.

W2BN is functional but I believe you have to be on a list to have access. John W0PM should know more about it. I don't know who is managing it, but I think it's on his server.

Loren, access to the w2bn.org website is not the same as access to the W2BN EchoLink Node. You've had access to the Echolink Node for quite some time, from what I can see.

You should be able to connect right up to it.

Hi friends, Brian here ab8yt. We used to have a sunday night net on the w2bn echolink mode but that was discontinued in 2010. There had been a big "push" regarding the friends and ham radio between 2004 and 2010 but that settled back down to the way things had been between the morning text net and sunday evening 20m net. The saturday night ECARN net is a remnant of the big push. Those who have access to the w2bn website can go to the media section and see pictures of the various ideas regarding equipment and backup operation that some of the friends came up with during those years. ECHOLINK is a great tool to use when the HF bands are poor as long as the internet is working of course. It may be a good idea to restart a w2bn ECHOLINK net to kick around various ideas regarding emergency ops ect.73 and agape to all.Brian.AB8YT.

Years ago, Echolink was a great tool, and many brothers used it. *No more.*

I stopped using Echolink because only one or two brothers were using it, even after many posts here trying to "get the word out" and motivate the friends to use it. The issue was having to open UDP ports 5198 and 5199 in the router's firewall, something that few want to try or even ask for help.

. . . .

Just now, I tried to download favorites.txt to see if KG7KA was in it, but I can't login to John's site. (It looks like he upgraded it.) Another time; I won't have my Echolink computer back here on my desk until I rearrange my shack.

Thanks for the info brothers. Guess I'm a little behind the times. But with the ability to use Echolink from phones and tablets, dealing with ports is not an issue anymore. Actually Echolink sets the ports automatically when I install Echolink.on my Windows computers. Using Windows 10.

The world of RF over IP is very interesting it is extremely clear clear than most cell phones at least the system that my son and I put together I'm currently on an Allstar node that one of my sons built and programmed it works seamlessly and you call other nodes and as long as you're not or they're not on a repeater it is completely private 100% there is also a way into the node with just a headset and microphone that does not require a small radio which means you don't have to be licensed to be on it so it's on the other end is a ham radio operator as far as the government is concerned it's almost like a phone patch if there was a bunch of brothers that did this this is quite a network that could be developed that uses extremely small amounts of bandwidth and it works worldwide it's very fascinating To some it's not real radio because it's not totally rf but it works when all the bands are down and it's full quieting VHF or UHF I think mine was built for less than $100 with a parts... Last night was a great example I tried to check in but was told the frequency was in the use maybe my CQ through them off the real power that develops is when you tie in HF and the system you could catch Brothers for a check in regardless of floor noise or weather conditions my goodness you could even hold meetings on this because you wouldn't have any haters LOL
Wishing all the brothers worldwide a beautiful day Jimbo KD 8 y ya

854. 2017 Annual Picnic

Yahoo group: Area_5_ECARN_Group
Date: 2017-05-13 04:01:50 UTC
From: kc0o.mbrown@...
Topic: 854 Message: 854

Dear friends,

We are now making arrangements for our annual picnic, although this year it will not be in WV as in recent years. It will be Saturday, August 26, at the city park in Grove City, PA, at the "Optimist" shelter. If you look at a map of Pennsylvania, it is in the northwest part of the state, close to where U.S. routes 79 and 80 intersect. This will be a more economical location for the smaller groups that we have had recently. However, we will be "optimistic" and hope that some of you can come and share in some upbuilding association with us. For more information, please contact me and I will give you more details as they become available.

73,
Marlin

857. East Tennessee?

Yahoo group: Area_5_ECARN_Group
Date: 2017-05-23 18:52:46 UTC
From: timsamp@...
Topic: 857 Message: 857

Hello friends,

We moved to East Tennessee almost two years ago from the Fort Lauderdale area where we had an active group of JW Hams. In recent years the brothers there working with the RBC have licensed some 500 new operators. My wife and I were among them and enjoyed being part of the South Florida Emergency Communications Group, which was all JWs.

It's taken me some time to get settled here with a new job, new congregation and all that, but I want to start getting back into amateur radio operations and was wondering if there are any brothers in the area who are also hams.

Thanks in advance and thanks for letting me be part of the group. I hope to be able to start participating in the nets.

Your brother,
Tim Sampson

Is there an easy way to put the rendezvous on EchoLink? I have tried numerous times to connect via HF on the frequencies provided and only one time did I hear some unintelligible voice that was too far under the noise to understand.

Also, I have been trying to get a DMR radio working. I bought the TYT MD-380 but so far have not been able to get it hooked up to my computer so I can program it. (New dongle and software on the way from Amazon tomorrow.) Are any Brothers using either the BrandMeister or/and DMR-MARC technologies? Without any real experience however, it looks to me that these would be excellent ways of providing connection to the various Branch offices during emergency circumstances.

The poor ionosphereic circumstance that has been in effect lately might be made moot if I understand what I have been reading about DMR and EchoLink.

Please educate this nooby here! J

Hello Dan,

It's good to see that you are looking into alternate technologies, so that some of the friends can communicate under these continuing less-than-idea band conditions!

In decades past, Echolink used to be *very* popular through W0PM's W2BN Echolink node using the computer-to-computer method. A few times, I held my computer's microphone up to my radio's speaker so that the friends using Echolink (over the Internet) could hear the Rendezvous net on 14.307. Those brothers were either physically handicapped and/or did not have a ham station.

Do we need a special transceiver to use DRM? I know nothing about it. I *think* pictures are sent via DRM using EasyPal or QSSTV, but don't take my word for it. :-)

YB,
Mike

Yup! :-)

A good site for viewing what the real-time band conditions are --at least
at my QTH-- is bandconditions.com. I'm hosting it on my server at no
charge, since it is such a valuable source of propagation info.

This is a message (under the solid line) I sent to a Brother in New York who has spent some time trying to develop a reliable emergence response method. The radio must be a digital radio. There are several manufacturers. The radio takes the analog signal from the mic and converts it into a digital stream. The repeater takes the digital signal and distributes it to the appropriate network. I assume that the packets from the digital radio have a code to identify where the signal is to be repeated.

Programming the radio is no trivial matter. There are several variables that have to be entered just to get the thing to say “hello world.” Local radio clubs generally create custom codeplugs for the various manufacturers. There are also at least 3 or 4 architectures of repeaters. The one here in Denver is using BrandMeister and another one is DMR-MARC (http://dmr-marc.net/). DMR-MARC also has a world-wide database of ID numbers and issues them to licensed hams. Mine is 1108169. You can think of this as a telephone number for the DMR repeaters. I’m still trying to figure this stuff out so some of this may be completely wrong! ;-(

Hope this helps get the idea started. It sure looks to me like a “wave of the future.”

After almost 2 weeks of work I finally made my first digital contact. With the digital repeater network I would be able to hit the repeater listed first in the following list but it looks like it must be at least 30 miles from you. Not on that list is one in Mount Beacon which is only about 20 miles – just across the river from you. Here in the Mile High that would not be a problem but on 70cm those would probably be a long haul for you.

The radio I got is the cheapest one I could find; TYT MD-380. I got it for $99 and it included the programming cable and software and two antennae. There is a sister model; MD-390 that is identical to the 380 except that it is iP67 rated.

This technology should make Emergency reporting a breeze. You simply choose either Local, Regional (Mountain here), National and International. It seems to be an easy task to send SMS messages through this system too although I have not yet gotten that far. There is even an encrypted function which is illegal in the U.S.A. but it is part of the system. The repeaters work on a two-slot 12.5kHz channel using TDMA to carry both conversations on the single channel. The voice quality is better than telephone and there is zero background noise. When you near the edge of the signal area the sound just stops, no gradually increasing noise that finally overcomes the transmission.

Subject: Re: [Area_5_ECARN_Group] ECARN/RENDEZVOUS NET

Hello Dan,

It's good to see that you are looking into alternate technologies, so that some of the friends can communicate under these continuing less-than-idea band conditions!

In decades past, Echolink used to be very popular through W0PM's W2BN Echolink node using the computer-to-computer method. A few times, I held my computer's microphone up to my radio's speaker so that the friends using Echolink (over the Internet) could hear the Rendezvous net on 14.307. Those brothers were either physically handicapped and/or did not have a ham station.

Do we need a special transceiver to use DRM? I know nothing about it. I think pictures are sent via DRM using EasyPal or QSSTV, but don't take my word for it. :-)

YB,

Mike

Hello Brothers. I probably should have jumped in here sooner, but I've been very busy lately.

I'm very much involved with DMR, as we are a Motorola Solutions dealer and worked directly with Motorola in beta testing new MOTOTRBO products (MOTOTRBO is Motorola's 'version' of DMR. And Motorola pretty much 'invented' DMR and presented it to ETSI (www.etsi.org <http://www.etsi.org>) to be 'presented to the world', and further developed, as a 'standard' in the commercial communications industry).

We are also a third party developer of products for MOTOTRBO and one of those products is the c-Bridge. The c-Bridge is the device that has been used to create the world-wide DMR-MARC network.

When I get a bit more time, I'll post some information regarding DMR on the w2bn.org website.

For those who are not aware of it, the w2bn.org website crashed quite some time back and was unrecoverable. I've rebuilt the site but there's a lot more to do on it. If you have not registered as a new user on the new w2bn.org website, please do so. All previous registration information was completely lost.

From: K5LA
Topic: 877 Message: 877

Attention: John, W0PM and Daniel, W0BBR--or anyone familar with DMR

This week I received a DM-380 DMR radio and a Sharkrf openspot unit. I am up and running.
Can anyone suggest a BrandMeister channel that the brothers could use as a backup for our HF nets
plus as an emergency channel?
I have been monitoring 3100 but it is very busy.
Thanks Bothers,

Floyd, K5la

It's good to hear your optimism, Ralph!

However, https://www.google.com/search?q=solar+minimum *--and many other indicators--* seems to indicate that we are in for much more of the same old same old lousy band conditions. :-) We STILL have not reached the solar minimum.

Somebody please tell me why I'm mistaken! If I'm not, then what should we do so we can hear each other? Some other bands? ;-)

How about 60 meters? Not much there most of the time, but why not try it once (or twice)?

And 17 meters seems to have exploded. Not sure why it is better than other bands sometimes.

What I've seen on http://www.cleanairwithultraviolet.com/bandconditions/ doesn't seem to make sense to me, but I've found that it's quite accurate.

In any case, let's be flexible.

Brothers, please post your thoughts here.

882. RE: [Area_5_ECARN_Group] BrandMeister Channel for backup

Yahoo group: Area_5_ECARN_Group
Date: 2017-06-25 02:17:49 UTC
From: Dan Osborn
Topic: 878 Message: 882

It was originally my thought that we could use DMR for a excellent sounding net that could easily connect to any JW hams world wide. After spending a few hours on the air I have seen some major road blocks to that notion. From what I have read from repeater "rules" DMR is really better suited to brief QSOs between two stations. My research also suggests that creating a custom, unique channel is very much against the scheme of the mode. I am definitely still learning but perhaps there is a little used channel that is established somewhere where there is little traffic. The codeplug I loaded onto my TYT MD-380 however, does not even tell me which channel I am on. The author chose instead to use names and abbreviations like: W0TX LCL or W0TX WW.

Hello Daniel, W0BBR

There are many talk groups. Seems the only very busy channels (talk groups) are USA Nationwide 3100 or World Wide91 or 93.

Looks like we could pick a talk group such as 3108-Colorado, 3136 NY or TAC1-8951 and meet there. I have not tried it but it might be able to rename a talk group (channel name) to JW as long as the talk group (channel) number is unchanged.

Attached is a list of the talk groups that I have found.

Dan evidently the only limitations are if you are using a DMR repeater. Most DMR repeaters only have a few talk groups=most I have seen is 10 talk groups on a repeater. I am using a SharkRF open spot wired to the internet and I can access any BrandMeister talk if it is programed into my MD-380 radio.

Hi Mike,

It is to the point where it can't get much worse.

However, 40M this last weekend was OK and still predictable. If we didn't need our beauty sleep and stay on later, It appears like the band would have gotten better.

20M was fair. 8 checked in.

Hello Dan,

I looked up your local repeater Lakewood - W0TX information:

Dmr id: 310804

446.78750 -5

Color code 1

Talk group 1= world wide

Talk group 3=US English

Talk group 2 local

Read your MD-380 radio code plug and look under Digital contacts-you will see the name they gave (contact name) to each talk group and with call id. That Call ID number is the BandMeister Talk group.

Examples:

Worldwide= 91

USA Nationwide= 3100

North America=93

You should see the world wide and north America talk groups listed. Not sure what Talk Group id number they put in for local on that repeater.

Subject: RE: [Area_5_ECARN_Group] BrandMeister Channel for backup

It was originally my thought that we could use DMR for a excellent sounding net that could easily connect to any JW hams world wide. After spending a few hours on the air I have seen some major road blocks to that notion. From what I have read from repeater "rules" DMR is really better suited to brief QSOs between two stations. My research also suggests that creating a custom, unique channel is very much against the scheme of the mode. I am definitely still learning but perhaps there is a little used channel that is established somewhere where there is little traffic. The codeplug I loaded onto my TYT MD-380 however, does not even tell me which channel I am on. The author chose instead to use names and abbreviations like: W0TX LCL or W0TX WW.

Attention: John-W0PM, Daneil-W0BBR or anyone familiar with DMR

This week I received a DM-380 DMR walkie talkie and a sharkrf openspot unit.
They are up and running on the 3100 channel.

Can anyone suggest a BrandMeister channel that we could use as a back up to
our HF nets plus in case of an emergency?

Thanks Brothers,

Floyd, K5la

Beautiful! At the very least I can now know which talk group number I am actually using.

I was wondering today if we could choose a talk group that is rarely used for the net. Somebody already said something along that line earlier. Then the only minor problem would be that each station would be using one time slot in their repeater and then only when they are transmitting. Once the transmission leaves the repeater and hits the Internet though, it seems that we would not be monopolizing anything. At least that is how it seems to me. The packets that are traveling over the Internet should only be a bandwidth issue for the repeater and that should not be an issue with even a slow connection.

Talking to some of the people who run the Brandmeister repeater here I learned that they are connecting the repeater to the Internet via a microwave link to someone's house. They also said that they assisted another entity to get their non-ham repeater working at the same site and that those folks offered to let the Denver club use their Internet link as a kind of quid-pro-quo - although they did so really just out of kindness.

The biggest drawback in my observation though is that, at least for emergency preparedness concerns, the repeater would probably no longer work if the Internet were down. Then we would again have to use HF.

By the way, my email is w <mailto:w0bbr@...> 0bbr@... if you want to take this off of Ralph's YahooGroup.

Hello Brothers,

This is my DMR Digital radio setup and DMR information.. There are worldwide talk groups.

TYT MD-380 walkie takie radio purchased from Amazon for $94.99 They say 80% of the DMR radios are MD-380's.

SharkRF (OpenSpot) purchased from Ham Radio Outlet $239.95 (needed if there is no DRM repeater nearby or if you wish to work other talk groups not on the local repeater)

There are code plugs on the internet for sharkRF units and DMR radios for DMR channels to get started.

There are nets on DMR talk channels and also long QSO's as long as 1 or 2 hours.

Floyd and I have been able to chat on a several talk groups. The audio is absolutely amazing. There is no interference and no static background noise. There are occasional drop outs due to the digital nature of the transmissions and distribution but otherwise it is a really wonderful new technology.

My SharkRF works on a simplex channel. Normal procedure calls for each DMR station to allow 5 to 10 seconds between calls. Otherwise, the audio is as good or better than a regular telephone.

If anyone wishes to listen to a DMR talk group go to :
http://hose.brandmeister.network/scan/ and add talk group 3100 to the scanner.

There's a ham on 14.307 booming in here from central MN (KD0MOM). He's been working stations all over the US, feeding 600W into a 1000' loop 30' high.

Is the Rendezvous somewhere else today?

Dear friends,

Just a reminder that we will have the JW Ham Picnic this coming Saturday, August 26 at Grove City, PA. Anyone who is planning/interested in going and has not yet contacted me for details please do so.

Also, we are planning on having an HF station set up, so we invite you to listen for us. We will no doubt spend most of the time monitoring 14.307, since 20m will probably provide the best propagation during the daytime hours. We will also take a listen on 40m, around 7.194 for shorter-range contacts. I will try to monitor the ECARN reflector if you would like to set up a specific time, or send me an email directly. We will also be monitoring the W2BN Echolink node using the app on our smartphones.

Hi Jim,

Thank you for the update. Please keep us posted. When you can set up HF, use 14.307 or 7.285. If cell and internet go down, hopefully we can keep in contact by HF. Not sure how the branch wants to handle local communications.

73,
Ralph WD0EJA

Hi Ralph

We are receiving huge amount of rain on the north and east side of the city . The streets on my side of town are under and water is over the curbs . On the east side the rain totals are 8-10" in the last two hours. We still have power at the moment . As of 5:00 pm yesterday everyone in the congregation have bee accounted for and home safe.

Thanks,
James

Greetings,

Sunday was remarkable. 22 checked in. We were able to handle one emergency traffic from Aransas Pass. We were requested to make a phone call (W0BTU made the call.) to his family. He advised there were no communications other than radio. Why he picked us for help is unknown, but we were glad to do it.

From Charlie & Linda (K5BOH & K5YGG): We have heard personally from about 10 families in the Houston area, all in different parts of the city. All are okay at this time, with no water in their homes although the streets are flooded. One Kingdom Hall is flooded that we heard about. I'm sure there are many more. One brother's truck is under water and a total loss but the water has not gotten into his home yet. He is in SE Houston and has had 35 inches of rain with another 25 inches forecast by tomorrow. All still have electricity, running water and food for now. Prayers are how to help immediately.

Dear brothers ,
We have successfully made it through the hurricane with no damage except we
won't be able to set our RV backup for at least probably 2 weeks due to the
mud So I will not have my HF radio backup however I have been able to get
on DMR channel 5446...Continue to keep our Houston brothers in your prayers
it is on imaginable there In Southern Texas they're saying Houston has 50"
of rain so far A lot of brothers in the San Antonio area are in route to
them with chain saws generators and love to help out Lot of brothers have
opened their homes to take people in Imagine this on a global scale in just
a little while longer ...Take care of your brothers

From: tlounds@...
Topic: 946 Message: 946

Brothers,

Ralph (WD0EJA) suggested I send this email out to the group.

On October 4th my wife (Gina) and I will be stepping over into South America to begin serving with the English speaking congregation in Santa Cruz, Bolivia. The process of simplifying and refocussing our efforts has been a real challenge at times. After nearly 8 years of working to reach the goal we are finally in a position to take the next big step.

One of the harder things (or should I say hardest) that I still need to do is sell my ham radio equipment.

I don’t have a huge station but perhaps I have something others might need or benefit from having.

Here is just a sample…

Icom IC-756 Pro - Icom IC-706 MKllG - Ameritron AL-811H - Yaesu FL2100B - Little Tarheel Screwdriver Antenna w/controller.

If any of you brothers would be interested in more information or a list of what I have available or you know of anyone looking for equipment please feel free to send me an email: (tlounds@att.net mailto:tlounds@att.net) or call my cell (775-910-1724).

On a personal note I also want to express my thanks and appreciation to all of you brothers. I have enjoyed so much hearing and even talking with some of you over the years. I am truly going to miss hearing your voices and being able to check into the Saturday night emergency communications net. Jehovah willing maybe someday I will be able to check in from Bolivia.

Terry W4JHV

There must be something else going on because once you are in ECHOLINK you should be able to access any node on there.It is only the W2BN.org website that you need the special permission to log in. As W0PM said before in a previous email, the old W2BN website lost all its data, so even users that could log in to the website before needed to go through the new user permission. I never bothered to get permission to log into the new W2BN.org site and so I can't, however I can still get into the W2BN ECHOLINK node because permission to do so comes from the fact you are a ham. Once your ticket was verified, you should be able to access all nodes.BrianAB8YT

The W2BN echolink node is a private node. You have to be added to the whitelist to join or at least that is the way it used to be. It allowed us to have private JW nets.
You would have to contact W0PM to gain access.

Greetings brothers,

I also created an account at w2bn. It does say I do not have access. I also have echolink and it works fine, but guess I will have to wait before W2BN will grant access.

That is correct, at least in the Echolink program in Windows, where you have to modify router ports to use it. You have to download favorites.txt (favorite.txt?) from John's site to your PC after you are approved.

In my Android tablet app, though, it seemed like it might let anyone in, because I did not have to do that (nor did I see a way to). *But I am not sure.*

The Favorites.txt list is just so you can see who the other approved brothers are who can also join the W2BN node. If you are approved you would be able to access from any version of echolink.

Hi Danny,

It's been awhile since I used Echolink on Windows (XP Pro SP3); but unless I had that .txt file saved to a certain directory, I could not view or work anyone not on that list.

Has it changed?

Hello brothers,

The CQ Worldwide DX Contest, SSB
<http://www.contestcalendar.com/weeklycont.php#7941> will end at 0000 UTC
today. (http://www.contestcalendar.com/weeklycont.php)

I hope to be on 20m at 2100 today --with my lousy 12' high 75m dipole
antenna-- conditions and contesters willing.

FYI: The contesters on 7.285 yesterday were almost certainly working *split*
.
That is, the DX station was calling CQ somewhere else and saying "CQ
contest ... listening 7285". That's common, my brothers; has been for
years. In other words, none of them heard "the frequency is in use!"
because they were listening on the caller's frequency.

(Hey, maybe joining the contest there could clear the frequency for our
net!! Ya think, Ralph? Steve? ;-) <big grin>

Seriously, I hope to put up my old 160m inverted-L again soon, which worked
very well with our homebrew tuners on 160, 75, 40, and 20. When that
happens, I'll be more active on our nets. Ralph, I think I heard you on 40m
last night suggesting that 160 might be a great place for all of us in the
winter.

For anyone thinking that they can't possibly get on 160, see my pages at
http://www.w0btu.com/160_meters.html. I know quite a bit about what it
takes to have a good signal on 160, but please also see also the info about
radials at
http://www.w0btu.com/Optimum_number_of_ground_radials_vs_radial_length.html
by experts a lot smarter than me. Not said there is a quote by W8JI, a
long-time super station with a 120' tower and 120 full-size radials on the
surface of the earth. To make a long story short, there was another 160m
station near him on a small narrow city lot which used an Inverted-L and as
many radials as he could fit on his tiny city lot. He had as almost as good
a signal on 160m as W8JI did.

My Inverted-L had just two 10' high 1/4 wave zig-zag elevated radials. *It
was a contest pile-up-breaker with only 100 watts. *Another option is the
K2AV FCP (folded counterpoise) for very small lots with no room for
radials.

And you may or may not need a separate receiving antenna
<http://www.w0btu.com/Beverage_antennas.html> as I use sometimes.

C'mon, brothers, let's try 160! Erecting an antenna and radials is great
exercise, too! The apostle Paul said so! (1 Timothy 4:7, 8 ;-)

Ok, time to tune up on 20m here.

73, Mike

I certainly did not make that very clear.

We are one more hour behind UTC. For tonight, how about trying 01:30Z on 7.285? This puts it at the same time for those that had a time change.

If it does not work well, how about 00:30Z for next week on 7.285?

If this all fails we can try and go to 75M. This will be a challenge considering how crowded that band is.

The 40m band is *very* long right now; it's like 20m. And there's no solar disturbances whatsoever (http://www.w0btu.com/propagation.html).

My opinion is that we should move to 75 as we've done in the past. Tuning across the General portion right now, it's not wall-to-wall QSOs.

Ralph, I just remembered that you seemed to suggest trying 160, but when I heard you say that, you were very weak. Perhaps you can explain what you said here?

In any case, if enough brothers can get on 160, *that would be even better than 75 during this part of the sunspot cycle*! :-)

Katie and I will be soon be putting our 160m inverted-L with 2 10' high elevated radials (photos and description is at http://www.w0btu.com/160_meters.html) back up soon. Basically, the L portion is a wire thrown over a tree.

A K2AV FCP (folded counterpoise) a few feet high is much shorter and works just as well.
Good information about radials and counterpoises at http://www.w0btu.com/Optimum_number_of_ground_radials_vs_radial_length.html.

I should be good to go on 160M. Got the tuner working. The amp only needs 30 watts for full power. However, this band may not be a good choice for the rest of the friends. The size of the antenna is restrictive.

73,
RB WD0EJA

Thanks, Ralph.

Another reason we switched to 75 was there was almost no skip zone, and so more brothers could hear one another in spite of some QRM. I have been looking forward to that. :-)

And, there has been almost zero lightning in and around North America lately.

On Nov 11, 2017 3:40 PM, "'isotronantennas' wd0eja@... [Area_5_ECARN_Group]" <Area_5_ECARN_Group@yahoogroups.com> wrote:

I certainly did not make that very clear.

We are one more hour behind UTC. For tonight, how about trying 01:30Z on 7.285? This puts it at the same time for those that had a time change.

If it does not work well, how about 00:30Z for next week on 7.285?

If this all fails we can try and go to 75M. This will be a challenge considering how crowded that band is.

Yes, that's what I'm thinking, I doubt that many of the friends are 160m, and thus the antenna suggestions.

I've been tuning +/- around 14.307 since 21:00 looking for the Rendezvous net; it's now 22:22 and I still don't hear anyone, even though the band is (so far) in good shape. Is the net going to happen today?

There's a Veteran's net on 14.306.

Ok, I just found the group on 14.307. Signal strengths for me in SW Missouri have *really* deteriorated since I began listening at 21:00 UTC. I can barely hear Ralph, and even K1QZ is weak. I can hear W6EOE well.

It's now 23:10 UTC, 5:10 PM Central time. Did you mean to write 23:00 UTC earlier, Ralph?

Hi Jon (et al),

I'll do whatever it takes to get on whatever 160m frequency needed; but I personally prefer the lower end of the 160 phone band. That is, closer to 1900 (or below) as opposed to 2000. That would require modifications to my tuner, but we can do that. :-)

Below 1850 is CW and Digital. There is an SSB group on 1850, and a ham who has been broadcasting ham news on 1860 AM for many years. Between 1865 and 1900, I don't know.

I must need a lesson in UTC. With the time change, I figured Central time as 5 hours behind. Mtn Time as 6 hours behind. Wrong! C.T. is 6 hours behind, I am 7.

40M worked well until net time, then it went very long.

Next week, how about if we meet on 3.853 + or - at the same time. 00:30 UTC or 18:30 C.T.?

"If the trumpet sounds an indistinct call, who will get ready for battle?"

Where is everybody? :-)

I put out a call with 100w. (I can turn on the amp if necessary.)
All of a sudden, there's a loud group on 3854. How about ~3851? That's
clear here.

1016. ECARN/RENDEZVOUS NET

Yahoo group: Area_5_ECARN_Group
Date: 2017-11-25 14:20:43 UTC
From: isotronantennas
Topic: 723 Message: 1016

Greetings,

Net tonight and Sunday, hope to hear you on.

73,
Ralph WD0EJA

ECARN DURING S.T.: 23:30 UTC SATURDAY 3.853 MCS. Or 18:30 C.T.

RENDEZVOUS NET DURING S.T.: 21:00 UTC SUNDAY, 14.307 MCS. Or 16:00 C.T.

ALTERNATE FREQUENCY IF PROPAGATION IS POOR ON 14.307 MCS.

7.191 + OR -, PREFERABLY MINUS, SUNDAY. IF THE BAND GOES OUT, USE THIS OPTION AT 23:00 UTC.

1017. Re: [Area_5_ECARN_Group] ECARN/RENDEZVOUS NET

Hi Ralph and other friends: Just a correction on the net times. Now that daylight savings is not in use, E.T. zone is 5 hours behind U.T.C. and C.T. zone is 6 hours behind U.T.C.Therefore the net tonight at 23:30 UTC would be 18:30 E.T., 17:30 C.T. The net tomorrow at 21:00 UTC would be 16:00 E.T., 15:00 C.T.Hopefully propagation will be reasonably well tonight and tomorrow.73 + agape to all!

Well, let's see...

- Is it Saturday? Check.
- Is it 23:45? Check.
- Is 75m in good shape? Check.
- Is 3853 clear? Check.
- Am I running split? Nope.
- Am I on my dummy load? Uh-uh. ;-)

I've put my call out, but no responses. Where is everyone? :-)

Hi Mike, I checked in yesterday with Steve's help. I think there was about a half dozen,. No one but Steve could hear me. However, the 3853 group at 4:30 EST was hearing me. I had to use an internet sdr receiver because the noise here was horrendous. Our meeting was cancelled last night which allowed me to get on. But I'm going to try making the 4:30 group on Sundays. I think mostly due to terrain here, 20 meters stateside just doesn't work for me, but 80m nvis seems good.

Thanks, Marlin. The change to 75 meters is a huge improvement, since we are still in this period of very low solar activity (which will continue for several years with occasional short improvements).

We should actively promote the idea of using a good Internet WebSDR station for supplemental receiving. (I haven't done that in a long time, but I should.) Once, I had two of them going at once; some of the friends could be heard on one, and others could be heard on another (but not the first) WebSDR. Some online SDRs at www.websdr.org --even on the same band-- are better than others, and so it's beneficial to experiment ahead of time before the nets come on.

And 20m was again in bad shape for me the last time. It was *very* long. I could only hear W6EOE (Darrow, who I was able to work!) and CE2NEK(?) Harald. I have not been able to hear Ralph WD0EJA on either 20 or 40 in many months. And even Steve K1QZ --who used to be 10 over 9-- has been in the noise lately.

I need a 20m beam on a tower, like Frank KT4NU! :-)

Hello Brothers, I have been trying to listen in on the net, but I only have a 20mtr antenna right now. I live in a mobile home park and only have a 'hamstick dipole' up about 18ft. Even then, I rarely hear the net on 14.307. Once in a while. My antenna does ok for what it is, I work Japan, some EU, south america... But I can't talk to Bill. Too close. :) Guess I'm going to have to get an 80/40 isotron and put it up. :) Don't have space for wire antennas.

I live in Hansen, Id. But go to the Twin Falls East congregation. Just wanted to say Hi. Got meeting tonight.

Take care,
Greg

Hello Greg,
Good to meet you. Doug (KX7H) here. I am over in La Pine Oregon. I know where you are located... my wife and i did seldom worked territory a few years back down the road from you in Burley. Regarding your antenna situation, are you able to put up a vertical? I use a Butternut hf6v mounted on my garage which has a metal roof. It seems to do reasonably well. I suspect that the Hustler 4btv (or the like)would probably perform similarly. If you could put up something like that I am fairly certain it would out perform the hamstick dipole.
73, Doug

Hi Doug. Nice to meet you. You probably met Ed and Pollyann Shaw, John Leoni, and others there in Burley.

Vertical... That's the problem. I don't have a back yard. My front yard is very small, and a ground mounted vertical would be a problem. No real room for radials. My home is about 26 feet from the neighbors house. Trees everywhere except where my outside hamshack is. If I roof mount it there, I'm not sure I can put up any kind of counterpoise.

I used a Hygain 18AVQ for several years in two other locations. Ground mounted in one, and edge of the roof mount in the other without a counterpoise. Worked to a degree, but that was in 91-93 when the bands were hot.

I'll study it a bit today in the daylight.

Hi Greg,

Isotron? Sounds desperate. It is not that it doesn't work, it is unethical. It might even ruin your reputation. I not only use them, I make them. The ECARN group has always wondered about me.

Hi Ralph! I knew you made them :) Desperate, yes. :) I bought an 80/40 pair from you in 1996. Moved to an acreage and didn't use them for 10 years, now I find myself back in a mobile home park with NO room. Except up...

Does anyone remember this?! ☐

[image: Inline image 1]

It would be nice to have some ragchews or skeds in addition to the ECARN and Rendezvous nets, as in years past.

Maybe between now and January 1? Much of the US will be extremely cold and snowed in then.

I remember calling Bob, WA4UQQ in 1973. I was 16 or 17. He sent me a letter with a list of hams and QSL cards. Must have been 2 inches thick. I think I still have it and all the letters he sent out. I didn't have a rig. He said just go get a Kenwood TS-120 and get on the air. (I didn't have my ticket yet.) Yea right! $500 bucks in 1973 to a broke teenager was more money than I could imagine. I bought a 1957 Chevy for $125. Those were the days!

When I was in my teens, I used to get on 7245 almost every afternoon of the week at 4:00 and 6:00 pm CST/CDT with Ralph (WD0EJA) and other brothers from Colorado, Kansas, Oklahoma, Texas, Iowa, Illinois, and Missouri. Sometimes it was only for 5 or 10 minutes, sometimes a lot longer.

Thanks, Jon!

Sorry I didn't see this sooner; hopefully, some other brothers saw this and called you.

I just got in from making sure(?) our pipes outdoors wouldn't freeze. Perhaps 40m would be a better choice this time of day (I don't know!***), but I don't have an antenna for 40 or 20 yet. (I just have a 75m dipole 12' high. It works to some extent on 20m.) I have been monitoring 14.307, but I will soon switch to 75m.

In addition to Ralph's excellent, ongoing contributions to bring us all together over the years --which we all are very grateful for-- I think we need more of this. And I hope Ralph has extra time!

*** I have found that http://bandconditions.com is fairly accurate. In addition to the main page which updates every 30 seconds, we should pay particular attention to the three links to the right of "BAND STABILITY LAST:". It's better than http://www.w0btu.com/propagation.html. Spaceweather.com is useful, also.

YB,
Mike

Yup! Before him there was Mac O'Dell, and then another brother whose name and call escapes me at present. I forget who sent me all the JW QSLs, but I still have them along with a lot of other letters from those days.

Notice that there used to be a CW time slot in the 1983 edition. I met two brothers in the city I lived in at the time (Toledo, Ohio). I think those QSOs took place in the old Novice CW band at the time. Gradually, no one was there.

Maybe we should also consider some weak-signal digital modes in addition to SSB? This is the place to coordinate all of this, but it might also be a good topic to discuss on the ECARN and Rendezvous nets.

I like the idea of the weak signal modes. Olivia, Contestia, Thor, etc. would be nice for just visiting.

Several of us, Steve. Ralph, Doug, Darrow are Q5 here, but there are others
I can't hear.

At 21:00 --when the net was scheduled to start-- Roger was coming in here,
the band was better then.

From: Greg Newberry
Topic: 1064 Message: 1064

Hello Brothers,

I'm ask this question because I know nothing about it, in spite of being a Ham for about 40 years.

As the natural disasters occur more and more often, how do Brothers with ham stations get involved? Is there a 'list' that the branch calls on? Or is it just done as needed by the JW-Hams who are in the location, or their stations and antennas allow them to be of help in passing traffic.

Just wondering how it is organized.

I also have and use (on occasion) Winlink Express. Is there any kind of a group email that I might receive if help is needed?

How is Winlink used in disasters?

Thanks brothers for filling me in,

73

Greg

At this time the Branch is not endorsing the use of Ham Radio for disasters. They have allowed the previous Florida RBC to use it. Please contact Frank, KT4NU for more information on what they are doing. We keep in contact with each other and in practice with the ECAR net. If and when the time comes, we are at their service.

WINLINK appears to be of value. Contact Ken, N4HUV or Keith K5YCM for more information on this.

We have a brother at the Branch that is interested in using this service. In time he may get to re-present our service.

73,
Ralph WD0EJA

From: Brian Burnett
Topic: 1064 Message: 1068

The branch is generally aware of the ham brothers. There was that article in the April 22 1976 Awake about Ham radio showing the brothers sked times. There was also what I call the big push between 2004 and 2010 when some bothers took the lead in trying to have us be more visible to the branch which did result in many brothers and sisters in Florida getting their Tech tickets as part of the RBC as mentioned in another email. In the end, everything went back to the way it has been for decades, the text net in the morning on 7.242 and the weekend skeds on 20, 40 or 80m. As far as using Winlink to send email by Ham radio, it is something fun to play with if you have the time, but in a really big disaster or act of terrorism, the Internet could be down anyway at the HF station or stations that are supposed to be linked into the NET. That is why it is better to have your station ready to be powered by some sort of backup power. The HF bands are not always in the best shape but they do not rely on on a sofisticated network to function. Plus we can relay messages if need be which was the initial function of the ARRL 100 years ago for example. One thing that would be a good idea is to brush up on CW. That's another one of those if you got the time things, but in a disaster where backup power is limited, you might not be able to run your computer for digital modes, but the human brain works great of CW. I am always amazed at seeing one of our older Ham brothers being able to copy CW at 15 or 20wpm and still carry on a conversation with you!Brian AB8YT

The branch is generally aware of the ham brothers. There was that article in the April 22 1976 Awake about Ham radio showing the brothers sked times. There was also what I call the big push between 2004 and 2010 when some bothers took the lead in trying to have us be more visible to the branch which did result in many brothers and sisters in Florida getting their Tech tickets as part of the RBC as mentioned in another email. In the end, everything went back to the way it has been for decades, the text net in the morning on 7.242 and the weekend skeds on 20, 40 or 80m. As far as using Winlink to send email by Ham radio, it is something fun to play with if you have the time, but in a really big disaster or act of terrorism, the Internet could be down anyway at the HF station or stations that are supposed to be linked into the NET. That is why it is better to have your station ready to be powered by some sort of backup power. The HF bands are not always in the best shape but they do not rely on on a sofisticated network to function. Plus we can relay messages if need be which was the initial function of the ARRL 100 years ago for example. One thing that would be a good idea is to brush up on CW. That's another one of those if you got the time things, but in a disaster where backup power is limited, you might not be able to run your computer for digital modes, but the human brain works great of CW. I am always amazed at seeing one of our older Ham brothers being able to copy CW at 15 or 20wpm and still carry on a conversation with you!

Subject: [Area_5_ECARN_Group] Assisting our Brothers in disasters with Ham Radio

Hello Brothers,

I'm ask this question because I know nothing about it, in spite of being a Ham for about 40 years.

As the natural disasters occur more and more often, how do Brothers with ham stations get involved? Is there a 'list' that the branch calls on? Or is it just done as needed by the JW-Hams who are in the location, or their stations and antennas allow them to be of help in passing traffic.

Just wondering how it is organized.

I also have and use (on occasion) Winlink Express. Is there any kind of a group email that I might receive if help is needed?

How is Winlink used in disasters?

Thanks brothers for filling me in,

73

That is why it is better to have your station ready to be powered by some sort of backup power. The HF bands are not always in the best shape but they do not rely on on a sofisticated network to function."

The internet could be *regionally* down, which is why HF Winlink is useful to jump thousands of miles over disrupted areas and reach a surviving node. Winlink can also be used in a radio-only message pickup mode which still supports store-and-forward operation -- but without any internet whatsoever. Besides this it can function in direct peer-to-peer mode -- also without any internet access, although this requires prior coordination of times and frequencies -- just like voice or CW does.

Winlink can also function over a local or regional MESH network. So there are multiple Winlink connection pathways -- HF to CMS, VHF/UHF to CMS, radio-only message pickup, peer-to-peer, and MESH. Only the HF and VHF/UHF to CMS require the internet. Info on MESH support, plus a video describing the various connection pathways: https://www.winlink.org/content/winlink_support_mesh_networks

The Winlink backbone is composed of five redundant Common Message Servers, each at a hardened site, located on three continents. Just one of those five CMS servers can run the entire Winlink system. Short of a sustained, global, total internet shutdown, the Winlink CMS system would probably remain operational.

Cellular service is unreliable in a disaster, but that's different from global internet service. Regional internet outages can (and have) happened, and HF Winlink is well-designed to deal with that. In a total global internet outage, Winlink is still usable for radio-only message pickup, peer-to-peer and MESH. Unlike PSK-31 it is error-free and allows binary attachments. Very roughly, Winlink's Winmor protocol is about 20 times more efficient than SSB at transmitted power to produce a given s/n ratio. It is about twice as efficient as CW. In a time of disaster when utilities are down and you're running on alternate power, that efficiency can be useful.

Re power to run a "computer", Winlink can run on a cheap Windows tablet, some less than $100. Some of those tablets consume about two watts. If there is no power to run that, I don't see how the radio itself could work.

Hello Friends,

Lately, the only way I can post to this group is via email. If I try to view the messages on the Yahoo group website, I get this message. And if I click on anything here, it just duplicates itself into a new window (here's a screen capture of it):

[image: Inline image 1]

I have been hearing stories for over two years about problems with Yahoo groups. One group I subscribe to (Softrock40) had so many issues with Yahoo that they moved everything over to groups.io. (Reportedly, so have many other unrelated groups on groups.yahoo.com). If anyone wants to see the conversations about this, I can try and find the (long!) discussion and post it.

Am I the only one? Maybe it's something at my end.

At this time the Branch is not endorsing the use of Ham Radio for disasters. They have allowed the previous Florida RBC to use it. Please contact Frank, KT4NU for more information on what they are doing. We keep in contact with each other and in practice with the ECAR net. If and when the time comes, we are at their service. WINLINK appears to be of value. Contact Ken, N4HUV or Keith K5YCM for more information on this. We have a brother at the Branch that is interested in using this service. In time he may get to re-present our service. 73, Ralph WD0EJA
----- Original Message ----- From: Greg Newberry greg@obillow.com [Area_5_ECARN_Group] To: Area_5_ECARN_Group@yahoogroups.com Sent: Tuesday, January 09, 2018 6:26 PM Subject: [Area_5_ECARN_Group] Assisting our Brothers in disasters with Ham Radio

Hello Brothers,

I'm ask this question because I know nothing about it, in spite of being a Ham for about 40 years.

As the natural disasters occur more and more often, how do Brothers with ham stations get involved? Is there a 'list' that the branch calls on? Or is it just done as needed by the JW-Hams who are in the location, or their stations and antennas allow them to be of help in passing traffic.

Just wondering how it is organized.

I also have and use (on occasion) Winlink Express. Is there any kind of a group email that I might receive if help is needed?

How is Winlink used in disasters?

Thanks brothers for filling me in,

73

Greg

Mike, friends,

I use Yahoo Groups for years now (for Winmor in the past) and I do not have this problem. I guess you already tried to sign out an signing in using another browser (FF57 or Chrome works fine for me)?

Moving to goups.io http://goups.io seems to be easy as they support importing groups from yahoo. I recently setup our emcomms group for dl here. Seems, that they are really focused on what groups need and all I can say right now is, that it works like a charm...

73 de Stefan,

DL3ESM.

Very interesting article. It matches with some obervations I've noticed over the years. I have never played with the DSP TX audio response on my HF transceiver before but that article has made me curious to try. Thanks Mike.BrianAB8YT

Glad you found it useful, Brian. One thing that I should make clearer there is how useless compression is when audio below 300 Hz is not cut. But people do it all the time.

On the ECAR net it was expressed to publish what was wrong with me:

RADIO MAN

He is a radio man with a micro mind.
There is no brain that anyone can find.
His eyes give off a neon gleam.
His ears look like a yagi beam.
He walks upon dipole feet.
And his voice sounds like a zero beat.
The doc looked up from his micro-scope and said with little hope,
there is no trace of a brain I can find,
he's a radio man with a micro mind.

73,
RB WD0EJA

An: Area_5_ECARN_Group@yahoogroups.com
Betreff: [Area_5_ECARN_Group] Anyone else have this problem with this Yahoogroup?

Hello Friends,

Lately, the only way I can post to this group is via email. If I try to view the messages on the Yahoo group website, I get this message. And if I click on anything here, it just duplicates itself into a new window (here's a screen capture of it):

I have been hearing stories for over two years about problems with Yahoo groups. One group I subscribe to (Softrock40) had so many issues with Yahoo that they moved everything over to groups.io. (Reportedly, so have many other unrelated groups on groups.yahoo.com). If anyone wants to see the conversations about this, I can try and find the (long!) discussion and post it.

Am I the only one? Maybe it's something at my end.

YB, Mike

I had a 746PRO for a while and liked it pretty well, but for some reason went back to Kenwood. I'm still figuring out how to use this FTdx-3000 and contacted 55 countries in the ARRL CW DX contest last Fri and Sat running the 3000, the ALS-500M (about 300w) and a windom at 20 feet. BTW, I can't do without the waterfall now, spoiled!!! Not needed though if simply working nets, ragchewing, etc.

Selling the TS-570DG and TS-590S and will probably get the IC-7300. That will make us a 2-rig family again, with the two AL-80BX amps. I thought about putting the 570 in the car, but mobile is too much trouble for me now, and since I'm not making the long drive to work anymore, kinda pointless.

After a little antenna work this spring we should be set for some time to come!!

Thanks for all you do re: the nets.

73 and Philia,

Don

Location: Springtown, TX which is 35 miles WNW of Fort Worth, TX

Crank up tower/pole

J-Pole VHF antenna broke off the top

Two windom wire antennas stripped off

We have numerous trees and big limbs down

Surprisingly, I've still been able to work a few stations on County Hunters today -- with a tuner cranking away though.

Lots of antenna work lies ahead.....maybe get one wire antenna up at 30 feet in the meantime.

Out power was out for about 20 hours and got to test my generator, which worked great keeping essential appliances working.

73 for now,

Don, K5TER

If I understand you all, it will be darker at that hour?

I could hear almost everyone. Hasta-la-bye-bye! :-)

YB,
Mike

Jimbo:

You might take a look at the ALS-500, that is, if you want to use 12V. It pulls about 70 amps peak, but puts out a good 400 watts or so. Also, I've use WINDOM antennas with good results, although a plain old 80 meter dipole would work well on 80 and fairly well on 40.

Ralph: This is Charlie. Let us know if the fire gets close to your house or if you have to evacuate. This was day two of our convention, and we heard from Ellie and Rhonda, they're headed for the farm in Mississippi on Tuesday, and then Houston from there.

Thanks,

Charles D Young

Odd, I just got my notice also. I sent it Saturday morning. It is even dated today. How does that happen?

My grandkids diagnosed it years ago as OAS (Old Age & Senility). CRS will do.
To all: K5BOH is home and weak after his heart attack and stents but overall doing well and regaining strength. Thanks to all who asked and sent greetings! -K5YGG.

From experience (mine and a number of others), I'd say the problem is almost certainly Yahoo Mail. Their mail server has been misconfigured for years; but whether that's the reason for this instance, I can't say.

I used to belong to the softrock40 Yahoo group, and people complained all the time about late or undelivered email. That group finally moved to https://groups.io/g/softrock40, and migrated everything from Yahoo to there. Problem solved! :-)

From: kc0o.mbrown@...
Topic: 1202 Message: 1202

Dear friends,

As announced earlier in the year, we will have the 2018 JW Ham Picnic next Saturday, August 25 at Grove City, PA. Anyone who is planning/interested in going and has not yet contacted me for details please do so.

Also, we are planning on having an HF station set up, so we invite you to listen for us. We will no doubt spend most of the time monitoring 14.307 MHz, since 20m will probably provide the best propagation during the daytime hours. We will also take a listen on 40m, around 7.194 MHz for shorter-range contacts. I will try to monitor the ECARN reflector if you would like to set up a specific time, or send me an email directly. We will also be monitoring the W2BN Echolink node.

Below are the details of our activities next weekend:

2018 JW Ham Picnic update:
1) Friday evening meal:
Friday August 24 @ 5:00 pm
Compadres Mexican Restaurant
1809 S Center St
Grove City, PA 16127
Tel: 724-748-4949
2) Talk-in:
I will be monitoring 146.52 on my ht. (I don't know of any close-by repeaters that would be reliable for the area, but if by previous experience you know of one that works in the area, let me know and I can modify this.)
We we'll be staying at the Grove City KOA on Friday night.
My cell #: 610-984-4452
3) Picnic site:
Grove City Memorial Park, Friendship Shelter
Saturday, August 25 @ 9:00 am
Official address: W Main St, Grove City, PA 16127
The following address will put you in front of the entrance: 1245 W Main St, Grove City, PA 16127
4) Portable Station:
We will attempt to make contacts throughout the day on:
7.194 MHz
14.307 MHz
Echolink -- W2BN node
We look forward to seeing those who can make it and hope to hear from you on the air if you can't be with us on-site.
73,
Marlin
KC0O

Subject: Re: hello Steven

okey, maybe you will have problem to recive me then? Because i have no longer the Hex beam and 800 w. I know have moved and have a full sise delta loop instead. And only 60-100 W. Most of the time 60 W, because at the time beeing i have 2:5 in SWR.

But still keep on listening. I am waiting for good propogation.

Tarjei

Den 20.08.2018 04:54, skrev Steven Naticchioni:

hi Tarjei

Yes I remember you. Yes propagation is bad. Also my best antenna broke during a bad storm and have not replace it.

The Brothers have ask you, and I have been listening. Maybe in the fall we can talk.

K1QZ - Steve

Hello Steven. I dont know if you remeber me? Tarjei, LA1VTA, frome Norway.

We have talked on the radio twice, but the condition has been Down here for more then 3-4 years. And they will still be Down for 2-3 more years i have heard. I hope you and the Brothers are alrigth? Many here in Europa are strogelling With the conditions i have heard.

Tarjei, LA1vta
